ERRATA

CLINICAL HEMORHEOLOGY 5, 765-812, 1985

THE HISTORY OF CLINICAL HEMORHEOLOGY

Alfred L. Copley
Laboratory of Biorheology, Polytechnic University
Brooklyn, New York 11201, USA

On page 784, first line from above, a typing error occurred, resulting in the omission of the following three words: "removal after their" between the words "their" and "invasion". Although the first four lines on this page were retyped for their printing and we were assured that this correction on page 784 would be made prior to the final printing of issue No. 6 of volume 5, it was unfortunately not done. The first four lines on page 784 should, therefore, read:

"croorganisms, their removal after their invasion into the circulation was found by the author to be a primary action of the blood platelets, as we reported with regard to BCG and other mycobacteria from 1955-1959 (182, 183)."

There were a few other typing errors which need correction:

They are:

Page 765
First line on top:
It should read "765-812".

Page 781
First paragraph, third line:
It should read "1632" instead of "1618".

Last paragraph, first line:
It should read "1869" instead of "1669".

Page 805
Reference No. 100, second line:
It should read "99" instead of "13".

Page 806
Reference No. 118, TO BE ADDED:

Page 809
Reference No. 167, first line:
It should read "fibrinogen (ogenin) lining".
