Publisher’s Note
New Editors

Developments began to take place earlier this year regarding the editorial structure of this journal when George Davies and Terry Malone intimated that the pressure of fresh commitments required that they relinquish their position as Editors of Isokinetics and Exercise Science. They have served in this capacity since the inception of the journal and we are grateful for their efforts in bringing the title to its present position and we are pleased that they are willing to continue supporting the development of Isokinetics and Exercise Science in the important but less exacting role as members of the Editorial Board.

It is always difficult to find capable Editors, and we are therefore very fortunate indeed that Mr. Angus Strover, from the Droitwich Knee Clinic, Droitwich (U.K.) and Dr. Zeevi Dvir from the Faculty of Medicine, Tel Aviv University (Israel) have accepted our invitation to take over the editorial reins.

The quality of a journal depends greatly on the Editors. We have every confidence that Angus Strover and Zeevi Dvir will protect and add to the fine reputation that Isokinetics and Exercise Science has built up by the efforts of their predecessors. We wish them great success and much personal satisfaction in this work.

For countries other than Americas:
Mr. Angus Strover
Droitwich Knee Clinic
St. Andrews Road
Droitwich
Worcs., WR9 8EA

Fax: (+972) 3-6409223
New Publisher

It will not have escaped the attention of our readers who peruse the journal from cover to cover, that *Isokinetcs and Exercise Science* is now published under a new imprint. As of 1 January 1995 Elsevier Science has taken over the publication from the former publisher, Butterworth-Heinemann. We shall strive to maintain the high standards and publishing tradition built up over the preceding years.

While the transfer involves some minor physical changes in the layout of the journal, our goals can still be defined as follows: to provide authors with high quality presentation of their articles, and world-wide dissemination of information. At the same time we will provide the readers with top level, peer reviewed information in a regular and timely fashion.

Whether you are an author, or a reader, or both, the Publisher and the Editors look forward to your continued support. We welcome new readers and authors and feel confident that our combined efforts will make *Isokinetics and Exercise Science* even more relevant and successful in the years to come. We also appreciate your suggestions for further improvements and enhancements.
