Abstracts Contents

Monday 13 September

THEME ONE PLENARY: Oedema and the Blood Brain Barrier

0 - 1  BRAIN EDEMA - THE “LETHAL ENIGMA” OF TBI
R Bullock, T Marmarou, P Fatouros (Richmond, USA) ................................. 131

0 - 2  THE PATHOPHYSIOLOGIC BASIS FOR TREATING TRAUMATIC BRAIN
EDEMA: NOVEL CONCEPTS
A Marmarou (Richmond, USA) ................................................................. 131

0 - 3  NEW DEVELOPMENTS IN THE PHARMACOLOGIC MANAGEMENT OF
POSTTRAUMATIC OEDEMA
R Vink (Adelaide, Australia) ................................................................. 132

SESSION 1.1: Inflammation

0 - 4  INFLAMMATION - BLOOD-BRAIN BARRIER - BRAIN EDEMA
A Baethmann, N Plesnila, J Schulz, D Pruneau, M Stoffel, J Eriskat (Munich, Germany) ................................. 132

0 - 5  INFLAMMATION AFTER TRAUMATIC BRAIN INJURY: RESEARCH MUST
GO ON.
MC Morganti-Kossmann (Melbourne, Australia) ................................... 132

0 - 6  INTERLEUKIN-1 RECEPTOR ANTAGONIST IMPROVES TRAUMATIC
BRAIN INJURY OUTCOME
AN Taylor, JK Bando, O Oluwadara, SU Rahman, HE Romeo, MJ Sanders, DL Tio
(Los Angeles, USA) .............................................................................. 133

0 - 7  MATRIX METALLOPROTEINASES ASSOCIATED WITH NEUROGENIC
INFLAMMATION AND SUBSEQUENT BRAIN EDEMA FORMATION
AFTER TRAUMATIC BRAIN INJURY
Y Katayama, T Kawamata, T Mori (Tokyo, Japan) .................................. 133

0 - 8  TIME COURSE OF MICROGLIAL RESPONSE TO TRAUMATIC AXONAL INJURY
LM Christian, PD Leclercq, B O’Dwyer, C Smith, D Graham, SM Gentleman (London,
Edinburgh, Glasgow, UK) ................................................................. 133

SESSION 1.2: Vascular Injury

0 - 9  ROLE OF ANGIOGENIC FACTORS IN BLOOD-BRAIN BARRIER
BREAKDOWN FOLLOWING BRAIN INJURY
SNag (Toronto, Canada) ........................................................................ 134

0 - 10  CHANGES IN BRAIN BARRIER PERMEABILITY FOLLOWING FOCAL
TRAUMATIC INJURY TO THE BRAIN
NR Saunders, N Bye, KM Dziegielewksa, CJ Ek, MD Habgood, A Potter,
C Morganti-Kossmann (Melbourne, Australia) ................................... 134

0 - 11  ORIGIN, PATHOGENESIS, AND FATE OF CHRONIC SUBDURAL HEMATOMA
KS Lee (Chonan, Korea) ................................................................. 135
0 - 12 MEDICAL THERAPY FOR POST-TRAUMATIC ICP INCREASE USING THE NOVEL NITRIC OXIDE SYNTHASE INHIBITOR VAS203
N Terpolilli, K Zweckberger, R Doblhofer, F Tegtmeyer, N Plesnila (Munich; Würzburg, Germany) ................................................................. 135

0 - 13 CHRONIC SUBDURAL HEMATOMA IN THE ELDERLY
Y Shigemori, Y Katayama, T Mori, T Maeda, T Kawamata (Tokyo, Japan) ................................................................. 135
SESSION 1.3: Neuronal/Glial Interactions

0 - 14 ROLE OF GLIA AND EXTRACELLULAR MATRIX IN VOLUME TRANSMISSION
Eva Sykova (Prague, Czech Republic) ................................................................. 136

0 - 15 CELLULAR AND EXTRACELLULAR MATRIX REACTIONS TO CNS DAMAGE
James Fawcett (Cambridge, England) ................................................................. 136

0 - 16 AQUAPORIN WATER CHANNELS: ROLE IN CEREBRAL EDEMA AND BRAIN WATER BALANCE
GT Manley, H Watanabe, DK Binder, MC Papadopoulos, AS Verkman (San Francisco, USA) ............. 137

0 - 17 PERSISTENT CYTOTOXIC OEDEMA AFTER ISCHAEMIC STROKE IN THE CONTEXT OF THE GLIAL - NEURON UNIT: FROM A MAGNETIC RESONANCE VIEWPOINT
H Rumpel, CL Ling, WEH Lim (Singapore) .................................................................. 137

0 - 18 ROLES OF ASTROCYTE REACTIVITY AFTER CRUSH SPINAL CORD INJURY
JE Herrmann, JR Faulkner, MJ Woo, MD Sislak, MV Sofroniew (Los Angeles USA) ............. 137

THEME TWO PLENARY: Penetrating and Blast Injury

O-19 NEUROTRAUMA IN THE AFGHANISTAN AND IRAQ THEATERS OF OPERATION
JM Ecklund (Washington, USA) ................................................................. 139

O-20 BLAST(EXPLOSION)-INDUCED NEUROTRAUMA: A MYTH BECOMES REALITY
I Cernak (Washington, USA) ................................................................. 139

O-21 THE U.S MILITARY’S RESEARCH EFFORT IN MILITARY RELEVANT NEUROTRAUMA
GSF Ling (Bethesda, USA) ................................................................. 140
SESSION 2.1: Models of Penetrating and Blast Injury

O - 22 INTRACRANIAL SOUND PRESSURE LEVELS DURING IMPULSE NOISE EXPOSURE
A Säljö, A Hamberger (Göteborg, Sweden) ................................................................. 140

O – 23 PENETRATING BRAIN INJURY IN THE RAT: I. MODELLING A SURVIVABLE, HIGH VELOCITY GUNSHOT WOUND TO THE HEAD WITHOUT USING A FIRED PROJECTILE
AJ Williams, X-C M Lu, JA Hartings, M Rolli, C Bautista, JR Dave, FC Tortella (Silver Spring, USA) ................................................................. 140

O - 24 PENETRATING BRAIN INJURY IN THE RAT: III. INTRACRANIAL PRESSURE, BRAIN SWELLING AND PHYSIOLOGICAL PARAMETERS
C Yao, AJ Williams, M Rolli, X-C M Lu, FC Tortella (Silver Spring, USA) ................................................................. 141
0 - 25 LEAKAGE OF S-100 PROTEIN AFTER HIGH VELOCITY PENETRATION INJURY TO THE BRAIN
M Risling; M Skold; I Larsson; M Angeria, J Davidsson (Stockholm, Gothenburg, Sweden) ............... 141

SESSION 2.2: Clinical Management

0 - 26 DEVELOPMENT OF INNOVATIVE PORTABLE DEVICES FOR THE TREATMENT OF MILITARY TRAUMA CASUALTIES
AN Kalehua, JM Eckland, T Switaj, C Yun, EY Lee, J Becker, P Mongan, H Alam, P Rhee, M Bowyer, GSF Ling (Washington, Bethesda USA) ................................................................. 142

0 - 27 Dr Thomas Kossman (no abstract available) ................................................................. 142

0 - 28 POLY-/NEUROTRAUMA: CLINICAL AND EXPERIMENTAL PERSPECTIVES OF DAMAGE CONTROL AND REPAIR
EAM Neugebauer (Cologne, Germany) ......................................................................................... 142

0 - 29 HYPERTONIC SALINE RESUSCITATION FOR SEVERE TRAUMATIC BRAIN INJURY PATIENTS.
DJ Cooper (Melbourne, Australia) ................................................................................................. 142

SESSION 2.3: Physical Protection in Neurotrauma
No abstracts available

Tuesday 14 September

THEME THREE PLENARY: Symposium Honouring Dr David Graham

0 - 30 RELATING IN VIVO PATHOPHYSIOLOGY TO NEUROPATHOLOGY AFTER HUMAN HEAD INJURY
JD Pickard, (Cambridge UK) ........................................................................................................ 145

0 - 31 THE CONCEPT OF SECONDARY AXOTOMY: THE BASIC SCIENCES.
WL Maxwell (Glasgow, UK) ........................................................................................................ 145

SESSION 3.1: Inflicted Head injury in Infants

0 - 32 INFANT HEAD INJURY - WHAT'S NEW?
H Whitwell (Sheffield, England) .................................................................................................... 145

0 - 33 INFLICTED HEAD TRAUMA IN INFANTS AND YOUNG CHILDREN - MEDICOLEGAL ASPECTS
RW Byard (Adelaide, Australia) ..................................................................................................... 146

0 - 34 CLINICAL DIAGNOSIS AND MANAGEMENT OF INFLECTED CHILDHOOD NEUROTRAUMA: NAVIGATING THE CONTROVERSIES.
AC Duhaime (Lebanon, USA) ........................................................................................................ 146

0 - 35 EXPERIMENTAL MODELS OF REPEAT HEAD INJURY IN THE DEVELOPING BRAIN
M Prins (Los Angeles, USA) ........................................................................................................... 146

SESSION 3.2: Axonal Injury

0 - 36 A REVIEW OF THE COURSE AND CONSEQUENCES OF TRAUMATIC AXONAL INJURY
JT Povlishock (Richmond, USA) .................................................................................................... 147

0 - 37 AXON DEGENERATION IN A MODEL OF WHITE MATTER ISCHEMIA
VH Perry (Southampton, UK) ......................................................................................................... 147
0 - 38FINITE ELEMENT MODELLING OF IMPACT-INDUCED AXONAL INJURY IN SHEEP
R Anderson (Adelaide, Australia) ................................................................. 147

0 - 39RELATIONSHIP OF DECREASED BRAIN TISSUE VISCOELASTICITY TO
TRAUMATIC AXONAL INJURY FOLLOWING TRAUMATIC BRAIN INJURY
K Darvish, J Stone (Richmond, USA) .............................................................. 148

0 - 40TRAUMATIC BRAIN INJURY EVOKE DIFFUSE AXONAL INJURY IN
THE SPINAL CORD
A Büki, D Szellár, A Zsombok, J Lükk, J Pál, T Dóczi, JT Povlishock (Pecs, Hungary; Richmond, USA) ................................................................. 148

SESSION 3.3: Trauma and Neurodegeneration

0 - 41THE LINK BETWEEN CELLULAR CHANGES ASSOCIATED WITH AXONAL
INJURY AND ALZHEIMER’S DISEASE
JC Vickers, TC Dickson, JA Chuckowree, RS Chang, AK West, MI Chuah (Hobart, Australia) ......... 148

0 - 42APOLIPOPROTEIN E AND BRAIN INJURY: GENETICS, BIOLOGICAL
MECHANISMS AND POTENTIAL FOR THERAPY.
JAR Nicoll (Southampton, UK) ........................................................................ 149

0 - 43NEUROPROTECTIVE EFFECTS OF sAPPα ADMINISTRATION
FOLLOWING TBI
C Van Den Heuvel, E Thornton, P Blumbergs, R Vink (Adelaide, Australia) ..................... 149

0 - 44INFLUENCE OF APOE GENOTYPE ON SECONDARY INSULTS AFTER
TRAUMATIC BRAIN INJURY
I Liaquat, I R Piper, LT Dunn, G Murray, GM Teasdale (Glasgow; Edinburgh UK) ............... 150

0 - 45REBUILDING THE BRAIN AFTER TRAUMATIC BRAIN INJURY: A
JOURNEY FROM CELL DEATH TO PLASTICITY AND REGENERATION
TK McIntosh, N Royo, N Markland, V Conte, C Fulp, H Thompson, S Shimizu, J Schouten, A Bakshi, L Longhi, H Laurer, P Lenzlinger, K Saatman, R Ragupathi, MS Grady, J Eberwine, JQ Trojanowski, DI Graham (Philadelphia, USA; Glasgow, UK) ...................... 150

Wednesday 15 September

THEME FOUR PLENARY: Spinal Cord Injury and CNS Regeneration

0 - 46REPAIRING THE DAMAGED CORD: FROM STEM CELL TO ACTIVITY-BASED
MECHANISMS OF RECOVERY
J W. McDonald III, (St. Louis, USA) ................................................................... 151

0 - 47PLASTICITY AND REPAIR AFTER SPINAL CORD INJURY
J C. Bresnahan (Columbus, USA) ..................................................................... 151

0 - 48MOLECULAR REGULATION OF AXONAL REGROWTH AND NEUROGENESIS
FOLLOWING CNS TRAUMA
PF Bartlett (Brisbane, Australia) ....................................................................... 151

SESSION 4.1: Syringomyelia

0 - 49PATHOGENESIS AND TREATMENT OF POSTTRAUMATIC SYRINGOMYELIA
J Klekamp (Quakenbrueck, Germany) ............................................................. 152
PATHOPHYSIOLOGY OF POST-TRAUMATIC SYRINGOMYELIA
MA Stoodley (Sydney, Australia) ................................................................. 152

RESPONSES OF ENDOGENOUS NEURAL STEM CELLS IN A MODEL OF POST-TRAUMATIC SYRINGOMYELIA
J Liao, J Tu, A Cunningham, M Stoodley (Sydney, Australia) ......................... 153

CSF HYDRODYNAMICS IN AN ANIMAL MODEL OF POST-TRAUMATIC SYRINGOMYELIA
A Abou-Hamden (Adelaide, Australia) .......................................................... N/A

SESSION 4.2: Regenerative Responses of Damaged Axons

NEW APPROACHES TO PROMOTE THE REGENERATION OF INJURED ADULT RETINAL GANGLION CELL AXONS
AR Harvey, K Park, Y Hu, SG Leaver, GW Plant, J Verhaagen, Q Cui (Perth, Australia; Amsterdam, The Netherlands) ................................................................. 153

GLIAL SCAR AND REGENERATION IN THE MAMMALIAN CNS: LESSONS FROM MICE KO FOR GFAP AND VIMENTIN
A Privat, M G Ribotta, V Menet (Montpellier, France) ...................................... 154

RHO ANTAGONISTS PROMOTE REPAIR AFTER SPINAL CORD INJURY
L McKerracher (Québec, Canada) ................................................................. 154

EFFECT OF TISSEEL® ON AXONAL REGENERATION IN THE DORSAL SPINAL COLUMN CRUSH IN THE ADULT LONG EVANS SHAKER RATS.
R Avram, C Hui, J Tang, K Neil, W Tawil, J Bain, JM Kwiecien (Ontario, Canada; Deerfield, USA) ... 154

GUIDANCE MOLECULE EXPRESSION IN THE REGENERATING AND DEGENERATING VISUAL SYSTEM
CE King, J Rodger, LD Beazley, SA Dunlop (Perth, Australia) ................................ 155

SESSION 4.3: Cell Therapy

OLFATORY ENSHEATHING CELLS AND SPINAL CORD REPAIR
A Mackay-Sim (Brisbane, Australia) ............................................................. 155

REPAIR OF SUBACUTE COMPRESSIVE SPINAL CORD INJURY WITH ADULT NEURAL STEM CELLS
S Karimi-Abdolrezaee, E Eftekharpour, J Wang, C Morshead, MG Fehlings (Toronto, Canada) .... 155

A NEWLY DEVELOPED ORIENTATED COLLAGEN TYPE I SCAFFOLD FOR USE IN ACUTE SPINAL CORD INJURY - CYTOCOMPATIBILITY AND ORIENTATED NERVE REGENERATION
S Moellers, I Heschel, J Noth, G Brook (Aachen, Herzogenrath, Germany) ............. 156

TRAUMATIC SPINAL CORD INJURY AND GENE THERAPY: SCHWANN CELL AND OLFATORY ENSHEATHING GLIA TRANSPLANTS
G Plant, M Ruitenber, AR Harvey, D Levison, J Verhaagen (Perth, Australia; Amsterdam, The Netherlands) ................................................................. 156

HEMATOPOIETIC STEM CELLS DERIVED FROM HUMAN UMBILICAL CORD BLOOD TRANSPLANTATION FOR SPINAL CORD INJURY
Y Nishio, M Koda, T Kamada, Y Someya, S Okada, Harada, M Yamazaki, H Moriya (Chiba, Japan) ... 157

THEME FIVE PLENARY: New Developments in Neurotrauma
SESSION 5.1: Imaging

116

0 - 62 APPLYING PROTEOMICS IN BRAIN INJURY STUDIES
KKW Wang, ND Denslow, RL Hayes (Gainesville, USA) ........................................... 159

0 - 63 BONE MARROW STROMAL CELLS - A PROMISING TOOL FOR THERAPY OF BRAIN AND SPINAL CORD INJURIES
P Jendelova, K Glogarova, L Urzikova, V Herynek, M Hajek, E Sykova (Prague, Czech Republic) .... 159

SESSION 5.1: Imaging

0 - 64 REGIONAL PET ANALYSIS OF GRAY VS. WHITE MATTER METABOLISM: IMPLICATIONS OF FOCAL PHYSIOLOGICAL MONITORING ACUTELY FOLLOWING TBI
M Bergsneider (Los Angeles, USA) ................................................................. 160

0 - 65 MAGNETIC RESONANCE SPECTROSCOPIC IMAGING AT 3 TESLA AND COGNITIVE FUNCTION IN TRAUMATIC BRAIN INJURY
WM Brooks, CR Savage, JA Liermann, R Aupperle, A Schmitt, L Ladesich, G Varghese, RE Jung, RA Yeo (Kansas City, USA) ..................................................................... 160

0 - 66 EVIDENCE FOR NEURO-PLASTICITY AFTER TRAUMATIC BRAIN INJURY: A PROSPECTIVE 2-YEAR MAGNETIC RESONANCE STUDY
P Goetz, A Blamire, B Rajagopalan, C Mackay, T Cadoux-Hudson (Oxford, UK) ....................... 161

0 - 67 EARLY CHANGES OF EXPERIMENTAL SPINAL CORD INJURY IN MICE BY MRI DIFFUSION TENSOR IMAGING AND MULTI-EXPONENTIAL T2 ANALYSIS
M Gaviria, J Bonny, H Haton, M Teigel, J Renou, A Privat (Montpellier; Champanelle, France) .... 161

SESSION 5.2: Proteomics and Genomics

0 - 68 CALPAIN AND CASPASE - 3 ACTIVATION IN PATIENTS WITH SEVERE TRAUMATIC BRAIN INJURY
SB Lewis, KK Wang, MC Liu, K Barami, JJ Tepas III, RL Hayes, JA Pineda (Gainesville, USA) ....... 162

0 - 69 GENE EXPRESSION PROFILE OF RAT Olfactory ensheathing cells
AJ Vincent, JM Taylor, JC Vickers, AK West, MI Chuah (Hobart, Australia; Oxford, UK) ............. 162

0 - 71 ACTIVATION AND INTERACTION OF P53 AND NFkB DURING CELL DEATH - ROLE FOR SECONDARY BRAIN DAMAGE AFTER CONTROLLED CORTICAL IMPACT IN MICE
LV Baumgarten, C Culmsee, A Baethmann, N Plesnila (Munich, Germany) ........................... 162

SESSION 5.3: Cell Therapy/Regeneration - Young Investigators

0 - 72 ADULT MARROW STROMAL CELLS ENHANCE Olfactory ENSheathing cell ATTACHMENT AND PROCESS ELONGATION
M Abrams, I Lee, D Prockop, L Olson (Stockholm, Sweden) ........................................... 163

0 - 73 DIFFERENCES IN THE NEURONAL STEM CELLS SURVIVAL, NEURONAL DIFFERENTIATION AND NEUROLOGICAL IMPROVEMENT AFTER TRANSPLANTATION OF NEURAL STEM CELLS BETWEEN MILD AND SEVERE EXPERIMENTAL TRAUMATIC BRAIN INJURY
T Shindo, N Kawai, S Nagao (Kagawa, Japan) ...................................................................... 163

0 - 74 THE USAGE OF KI-67 IMMUNOREACTIVITY IN STUDIES OF CELL PROLIFERATION AFTER TRAUMATIC BRAIN INJURY
S Ekmark, A Lewén, L Hillered (Uppsala, Sweden) ............................................................ 164
117

0 - 75 NEURAL STEM CELL'S TRANSPLANTATION PROMOTES GAP-43 mRNA EXPRESSION, MOTOR AXONAL REGENERATION AND FUNCTIONAL RECOVERY FOLLOWING SPINAL CORD INJURY IN RATS
L Li, W Hu, Z Fu, P Gu, Y Wu (Jiangsu, China) ................................................................. 164

Thursday 16 September

THEME SIX PLENARY: Effects of Gender and Age in Neurotrauma

0 - 76 TRAUMATIC BRAIN INJURY EARLY IN LIFE: EVIDENCE FOR INJURY-INDUCED DEVELOPMENTAL DISABILITY
Hovda DA, Giza CC, Prins ML, Lee SM, Griesbach GS, Gomez-Pinilla F, and Gurkoff GG (Los Angeles USA) ......................................................... 165

0 - 77 IS THERE A ROLE FOR HORMONAL THERAPY AFTER TRAUMATIC BRAIN INJURY?
HM Bramlett (Miami USA) ............................................................... 165

0 - 78 EFFECTS OF AGE AND GENDER ON LONG-TERM OUTCOME FOLLOWING TBI IN HUMANS
J Ponsford (Melbourne, Australia) ................................................................. 166

SESSION 6.1: Gender

0 - 79 GENDER DIFFERENCES IN DIFFUSE VS. FOCAL TBI IN MICE
ED Hall, TR Gibson, BM Thompson, Y Deng, KM Pavel, NC Kapina (Lexington, USA) ............. 166

0 - 80 REDUCTION OF APOPTOSIS AND NEUROPROTECTION MEDIATED BY ESTROGEN THERAPY FOLLOWING CORTICAL CONTUSION IN RATS
JF Soustiel, E Palzur, O Nevo, E Vlodavsky (Haifa, Israel) ................................................ 166

0 - 81 INVESTIGATING GENDER DIFFERENCES IN OUTCOME FOLLOWING SEVERE TRAUMATIC BRAIN INJURY
J Lee, J Lim, LK Keow, WH Bee, YT Tsai, J Ng (Singapore) ................................................ 167

0 - 82 THE INFLUENCE OF AGE AND GENDER ON THE AXONAL CHANGES WITHIN SPINAL CORD WHITE MATTER AFTER ACUTE TRAUMATIC CERVICAL SPINAL CORD INJURY: A HISTOPATHOLOGICAL AND IMMUNOHISTOCHEMICAL STUDY IN HUMANS
JC Furlan, MG Fehlings (Toronto, Canada) ................................................................. 167

0 - 83 EFFECTS OF GENDER ON CEREBRAL BLOOD FLOW AND METABOLISM FOLLOWING HUMAN TRAUMATIC BRAIN INJURY
TC Glenn, J Phan, J Lee, PM Vespa, DF Kelly, DA Hovda, NA Martin (Los Angeles, USA) ........ 168

SESSION 6.2: Age and Sporting Injuries

0 - 84 LATERAL FLUID PERCUSSION IN THE DEVELOPING RAT PRODUCES A STATE OF PRECONDITIONING
GG Gurkoff, D Shin, CC Giza, R Sankar, DA Hovda (Los Angeles, USA) ............................... 168

0 - 85 ATHLETES AND CONCUSSION
P McCrory (Melbourne, Australia) ............................................................... 168

0 - 86 PATHOPHYSIOLOGY OF REPETITIVE HEAD INJURY IN SPORTS: PREVENTION AGAINST THE CATASTROPHIC BRAIN DAMAGES.
0 - 87 MILD CONCUSSIVE HEAD INJURY RESULTS IN INCREASED BRAIN SUBSTANCE P IMMUNOREACTIVITY
J Donkin, I Cernak, K Rodgers, R Vink (Adelaide, Australia; Washington, USA) .............................. 169

SESSION 6.3: Neuropsychological Outcome

0 - 88 EVENT RELATED POTENTIALS (ERPs) AND IQs IN THE SEVERELY HEAD-INJURED PATIENTS. MEANING OF OMISSION AND FAILED IDENTIFICATION OF P300 PEAKS.
Y Naito, H Ando, K Seki, T Yamada, T Kamishima, H Zenjirō, M Yamaguchi (Osaka, Japan) .............. 170

0 - 89 DELINEATING COMMUNICATION IMPAIRMENTS ASSOCIATED WITH MILD TRAUMATIC BRAIN INJURY (MTBI): A CASE REPORT
B-M Whelan and BE Murdoch (Brisbane, Australia) ............................................................................... 170

0 - 90 THE ROLE OF THE BASAL FOREBRAIN AND ASSOCIATED STRUCTURES IN THE COGNITIVE SEQUELAE OF HEAD INJURY
CH Salmond, DA Chatfield, DK Menon, JD Pickard, BJ Sahakian (Cambridge, UK) .............................. 171

0 - 91 LINKING LINGUISTIC RECOVERY AND MILD TRAUMATIC BRAIN INJURY (TBI) IN CHILDHOOD
K M Docking and B E Murdoch (Brisbane, Australia) ............................................................................. 171

0 - 92 ASSESSMENT OF TONGUE FUNCTION FOR SPEECH IN INDIVIDUALS WITH TRAUMATIC BRAIN INJURY: ARE MEASURES OF TONGUE STRENGTH, ENDURANCE, AND FINE PRESSURE CONTROL RELEVANT?
JV Goozée, BE Murdoch, MS Kuruvilla (Brisbane, Australia) ................................................................. 171

THEME SEVEN PLENARY: New Frontiers in Neurotrauma Management and Therapeutics

0 - 93 SPINAL CORD INJURY: TRANSLATING SCIENTIFIC DISCOVERY TO CLINICAL TRIALS
J Steeves (Vancouver, Canada) .............................................................................................................. 173

SESSION 7.1: Neuroprotection

0 - 94 THE PRESENT AND FUTURE OF CLINICAL TRIALS IN TBI
AIR Maas, A Hernandez, E Steyerberg, A Marmarou, G, Murray (Rotterdam, The Netherlands; Richmond, USA; Edinburgh UK) ......................................................................................... 173

0 - 95 THE FAS DEATH RECEPTOR AS A TARGET FOR NEUROPROTECTIVE THERAPY OF ACUTE SPINAL CORD INJURY
M Fehlings, S Casha, A Ackery, W Yu (Toronto, Canada) ...................................................................... 174

0 - 96 NEURON-ASTROCYTE INTERACTIONS FOLLOWING NEURONAL INJURY ACTIVATE A NOVEL, METALLOTHIONEIN BASED NEUROPROTECTIVE MECHANISM
RS Chung, J Dittmann, MI Chuah, JC Vickers and AK West (Hobart, Australia) ................................. 174

0 - 97 ADENOSINE A2A AGONISM ATTENUATES NEURONAL DAMAGE AND IMPROVES FUNCTIONAL OUTCOME FOLLOWING EXPERIMENTAL TRAUMATIC SPINAL CORD INJURY (SCI): COMPARISON TO METHYLPRERONISOLONE
DO Okonkwo, TB Reece, JJ Laurent, AS Hawkins, J Linden, JR Stone, GA Helm, JA Kern (Charlottesville, USA) ................................................................................................................... 175
0 - 98 QUERCETIN PRESERVES AXONAL INTEGRITY AFTER ACUTE SPINAL CORD INJURY
Schültke, G Davies, RW Griebel, BHJ Juurlink (Saskatchewan, Canada) ...............175

0 - 99 CALPAIN INHIBITION STRATEGIES FOR TRAUMATIC CNS INJURY
JW Geddes, T Sengoku, M Garcia, V Bondada (Lexington, USA) .......................176

SESSION 7.2: Hypothermia

0 - 100 THERAPEUTIC HYPOTHERMIA FOLLOWING BRAIN AND SPINAL CORD INJURY
WD Dietrich (Miami, USA) .............................................................................176

0 - 101 EFFECT OF HYPOTHERMIA ON INTRACRANIAL PRESSURE, CEREBRAL PERFUSION
PRESSURE, SYSTEMIC CONDITIONS, AND OUTCOME IN PATIENTS WITH SEVERE
TRAUMATIC BRAIN INJURY
Tokutomi, T Miyagi, K Morimoto, M Shigemori (Fukuoka, Japan) .................176

0 - 102 TAI AND RESPONSE OF THE AXONAL CYTOSKELETON TO DIFFERENT RATES
OF RE-WARMING AFTER MILD POST-TRAUMATIC HYPOTHERMIA.
Maxwell, A Watson, B Conway, R Queen, D Graham (Glasgow, UK) ...............177

0 - 103 THE SIGNIFICANCE OF THE RELATION BETWEEN BRAIN TEMPERATURE
AND CORE TEMPERATURE IN BRAIN HYPOTHERMIA TREATMENT FOR
SEVERE TRAUMATIC BRAIN INJURY
Suehiro, H Fujisawa, T Akimura, M Suzuki (Yamaguchi, Japan) .................177

0 - 104 TOPICAL HYPOTHERMIA FOLLOWING SPINAL CORD INJURY: TRANSIENT
NEUROPROTECTION BY DOWNREGULATION OF SECONDARY DAMAGE
CB Shields, YP Zhang, N Liu, LBE Shields, Z Zhang, L Xu, X Xu, Y Han (Louisville, USA) ....178

SESSION 7.3: Controversies in Clinical Management

0 - 105 TARGETED THERAPY FOR BRAIN INJURY
P Reilly (Adelaide, Australia) .........................................................................178

0 - 106 THE AUSTRALIAN DECOMPRESSIVE CRANIECTOMY (DECRA) RANDOMISED
CONTROLLED TRIAL: DESIGN AND PROGRESS REPORT
Rosenfeld, DJ Cooper, T Kossmann, L Murray, PD’Urso, A Davies, GM Malham,
Pelligrino, P Reilly (Melbourne; Adelaide, Australia) ..................................179

0 - 107 OUTCOME AFTER DECOMPRESSIVE CRANIECTOMY DUE TO REFRACTORY
INTRACRANIAL HYPERTENSION IN PATIENTS WITH TRAUMATIC BRAIN
INJURIES
Skoglund, C Eriksson-Ritzén, C Jensen, B Rydenhag (Göteborg, Sweden) ..........179

0 - 109 COMBINATION OF VENOARTERIAL PCO2 DIFFERENCE WITH ARTERIOVENOUS
O2 CONTENT DIFFERENCE TO DETECT ANAEROBIC METABOLISM DURING
PROGRESSION TO BRAIN DEATH
Roncati Zanier, R Nicolini, K Canavesi, V Conte, A Protti, L Gattinoni, N Stocchetti
(Milano, Italy) .................................................................................................179
POSTER SESSION A

PA - 01 NONLINEAR DYNAMIC MODELING OF EPILEPSY SUFFERERS AFTER HEAD INJURY
T Ahmad, J Abdullah, F Zakaria, F Mustapha, AM Hussin, R Salmi, MH Zabidi
(Johor; Kelantan, Malaysia) .............................................................. 181

PA - 02 CROSS SECTIONAL STUDY OF AETIOLOGY, CLINICAL AND
ELECTROENCEPHALOGRAPHIC CORRELATION OF RURAL
NORTH EAST MALAYSIAN PATIENTS WITH INTRACTABLE
EPILEPSY: IS THERE A HIGH INCIDENCE OF TRAUMATIC
HEAD INJURY CAUSING EPILEPSY?
J Abdullah, Y Mohamed, NN Alias, IL Shuaib, J Tharakan (Kelantan, Malaysia) ............. 181

PA - 07 LONG-TERM HEART RATE VARIABILITY CHANGES FOLLOWING
TRAUMATIC BRAIN INJURY: A PILOT STUDY
I Baguley, S Slewa-Younan, R Heriseanu, CD Rae (Sydney, Australia) ......................... 182

PA - 11 DIAGNOSIS OF POSTTRAUMATIC VENOUS SINUS THROMBOSIS WITH
CT VENOGRAPHY
Y Sumi, O Tazaki, T Shiozaki, H Tanaka, T Shimazu, H Sugimoto (Osaka, Japan) ........ 182

PA - 12 SURGICAL TREATMENT FOR CEREBRAL CONTUSION: EVALUATION OF
182 PATIENTS REGISTERED IN THE JAPAN NEUROTRAUMA DATA BANK
T Kawamata, Y Shigemori, T Mori, T Maeda, Y Katayama (Tokyo, Japan) ..................... 183

PA - 13 THE CHEMOKINE FRACTALKINE IN PATIENTS WITH SEVERE TRAUMATIC
BRAIN INJURY AND IN A MOUSE MODEL OF CLOSED HEAD INJURY
M Rancan, N Bye, VI Otto, O Trentz, T Kossmann, S Frentzel, MC Morganti-Kossmann
(Melbourne, Australia; Zurich, Basel, Switzerland) ............................................. 183

PA - 14 THE ROLE OF S-100B PROTEIN FOLLOWING TRAUMATIC INJURY
JE Slemmer, CI De Zeeuw, JT Weber (Rotterdam, The Netherlands) .......................... 183

PA - 16 CEREBRAL BLOOD FLOW, CEREBRAL METABOLIC RATE OF OXYGEN AND
CLINICAL OUTCOME IN PATIENTS WITH DIFFUSE AXONAL INJURY
H Tomita, U Ito, O Tone, M Tamaki, M Hara, M Inaji, K Ohno (Tokyo, Japan) ............... 184

PA - 17 CEREBRAL ISCHEMIA: CEREBROVASCULAR AND NEUROCHEMICAL RESPONSES
CM Loftus, D Surdell, P Tompkins (Oklahoma City, USA) ........................................ 184

PA - 19 METALLOPROTEINASE-9 EXPRESSION IN HUMAN TRAUMATIC BRAIN INJURY
N Kawai, T Shindou, S Nagao (Kagawa, Japan) ...................................................... 185

PA - 21 ACTIVATED CASPASE-3 IN HUMAN TRAUMATIC BRAIN INJURY
J Wong, WL Tan, I Ng (Singapore) ................................................................. 185

PA - 22 CASPASE-7: UP-REGULATED AND ACTIVATED IN TRAUMATIC BRAIN
INJURED RATS
SF Larner, DM McKinsey, RL Hayes (Gainsville, USA) ........................................... 185

PA - 23 AMYLOID PRECURSOR PROTEIN AND ACTIVE CASPASE-3 IN HUMAN
ACUTE AND CHRONIC COMPRESSIVE MYELOPATHY
REA Newcombe, PC Blumbergs, G Sarvestani, J Manavis, NR Jones (Adelaide, Australia) .... 186

PA - 26 AII-SPECTRIN AND SEVERITY OF INJURY AFTER CONTROLLED
CORTICAL IMPACT IN THE IMMATURE RAT BRAIN
PA - 27 BEHAVIORAL AND HISTOLOGICAL OUTCOME AFTER LATERAL FLUID PERCUSSION INJURY IN MONGOLIAN GERBILS
S Li, T Kuroiwa, S Ishibashi, N Katsumata, S Endo, K Ohno (Tokyo, Japan) ................................. 187

PA - 30 EXPOSURE TO ENVIRONMENTAL COMPLEXITY COMBINED WITH MULTIMODAL STIMULATION IS ASSOCIATED WITH REDUCED CNS SCAR FORMATION AND REVERSAL OF NEUROMOTOR DYSFUNCTION AFTER TRAUMATIC BRAIN INJURY
M Maegel, T Ester-Bode, DN Angelov, TK McIntosh, EAM Neugebauer, M Lippert-Gruener (Philadelphia, USA) ........................................ 187

PA - 31 TRANSGENIC MICE TO STUDY ROLES OF ASTROCYTES AFTER TRAUMATIC BRAIN INJURY
DJ Myer, T Imura, S Lee, D Norton, MV Sofroniew (Los Angeles, USA) ................................. 188

PA - 33 THE NUMERICAL RELATIONSHIP BETWEEN "DARK" NEURONS AND SURVIVING NEURONS FOLLOWING LATERAL FLUID PERCUSSION INJURY IN RATS: THE DIFFERENCE BETWEEN HIPPOCAMPUS AND CORTEX
H Ooigawa, H Nawashiro, N Otani, A Ohtsumi, A Yano, N Nomura, K Shima (Tokorozawa, Japan) .................. 188

PA - 34 ALTERATION OF MEMBRANE PHOSPHOLIPIDS IN THALAMUS FOLLOWING RAT FOCAL ISCHEMIA
M Kubota, M Nakane, JH Son, T Nakagomi, A Tamura, H Hisaki (Tokyo, Japan) .................. 189

PA - 35 TOPOGRAPHY OF C-FOS IMMUNOREACTIVITY IN AN OVINE HEAD IMPACT MODEL.
