

Keyword Index Volume 9 (2013)

arch-frame bridge	21	limit state	21
Bandhauer	83	live load	115
Bridge	83	load rating	155
Bronx	37	load	101
		low cycle fatigue	185
		LRFD bridge erection engineering	135
cable damper requirements	37	LRFD steel bridge erection	135
cable stayed bridge	3	LRFD	115
cable-stayed	83		
calibration	115	multi-scale design	3
cantilever construction	21		
City Island	37	NDE	123
collapse	83	Nienburg-an-der-saale	83
concrete	123		
		Pedestrian bridge	101
deck	123	plastic design	73
deflection	101		
delayed deformations	21	reinforced concrete box culvert	155
design standards	73	reliability	115
design	115	retrofit	57
diagnostic load testing	155	robotics	123
distortion-induced fatigue	57	Roebbling's bridge stability criteria	37
durability	21		
dynamic amplification	155	Sachsen-Anhalt	83
dynamic response	101	segmental bridge	21
		seismic	185
Extreme-event loading	169	serviceability	21
		shake table test	3
failure	83	shakedown theory	73
fatigue	57	soil-structure interaction	155
fiber reinforced plastics	3	stability analysis	37
field instrumentation	155	steel bridges	57, 73, 115
fill height	155	structural dynamics	169
finite element analysis	155, 169	surface waves	123
full bridge model	3	suspension	83
		vessel collision	169
GPR	123	wind speed criteria	37
		wind study	37
history of wind action on cable-supported bridges	37	wrought-iron	83
impact echo	123		
integral bridge	185
