EDITORIAL:
SOFTWARE SURVEY SECTION

The purpose of the Software Survey Section in CLINICAL HEMORHEOLOGY is to
encourage the open exchange of information on software programs unique to
our professional field. With the rapid penetration of computers into
academic and industrial institutions has come a parallel increase in the
number of scientists and researchers designing their own software. The
existence of much of this software remains unknown to even those of us who
could most benefit from its use. We believe that it is of vital importance
to our readers that such information be made available. We believe also that
a professional journal is the best place to share such information. Your
contribution would be most welcome.

The questionnaire on the following pages is designed to assist you in
reporting on software that you may have developed or be in the process of
developing. By completing this form, your information will reach thousands
of your colleagues who may benefit from your work and may possibly offer
suggestions for further enhancements to your software. Please complete the
enclosed form and return it to:

Dr. Andrew McCulloch
Department of Applied Mechanics and Engineering Sciences

We do not intend to review or comment on the contents of the questionnaire.
It will be published as is in order to expedite the information cycle
process. I would welcome any comments you may have.
