PREAMBLE

ABSTRACTS OF THE SEVENTH EUROPEAN CONFERENCE ON
CLINICAL HEMORHEOLOGY

16 - 19 July 1991
Southampton, United Kingdom

Abstracts of the Seventh European Conference on Clinical Hemorheology are included in this issue. Although they are not presented in the way we publish Abstracts of Meetings of interest to our Readers, an exception is made with regard to these Abstracts. Otherwise, we would need to have them retyped, which was not feasible. It should be noted that the following 220 Abstracts are presented in the way they appeared in the book of Abstracts, issued by the Conference. In order to facilitate matters we include the name index as it appeared in the Conference Book of Abstracts.

The keys, given in the index are as follows: PL for the two Plenary Lectures, S for the eight Symposia, F for Free Communications, and P for Posters.

It should be noted that no Abstracts were included in the above mentioned Conference Book for The Robin Fåhræus Award Lecture and The A.L. Copley Lecture for Young Investigators in Clinical Hemorheology. These Lectures will be published in Part I of the Proceedings of the Seventh European Conference on Clinical Hemorheology, edited by S. Witte and O.S. Roath in a forthcoming issue of CLINICAL HEMORHEOLOGY as soon as possible.

Each page has on the upper left and right hand corner the page number of issue number 6 of volume 28. However, we kept the page number in the middle of the lower margin of each page, as it was printed in the Conference Book of Abstracts. This makes it possible to identify the page on which the Abstract appears in this issue in accordance with the name index of the book of Abstracts.
