

Preface

This issue of *Fundamenta Informaticae* contains four papers selected from those presented at the third international conference on *Typed Lambda Calculi and Applications* in Nancy, France, April 2–4, 1997.

These papers have been through the normal refereeing process of *Fundamenta Informaticae* in addition to the refereeing required by the conference.

Preliminary versions of the papers have been published in the Proceedings of the conference: *Typed Lambda Calculi and Applications, TLCA '97*, edited by Ph. de Groote and J. Roger Hindley, *Lecture Notes in Computer Science* No. 1210, Springer-Verlag, 1997.

The editor is very grateful to the authors for submitting their papers to this special issue, and to the referees for their very useful work.

Roger Hindley
Special Issue Editor
