

Keyword Index Volume 3 (2013)

abscisic acid	1	fruit traits	103
allergen	197	fruit yield	217
anthocyanins	41, 53, 103, 113, 159	genetic resources	127
antioxidant	41, 65, 103	genetically modified organisms	127
aphids	203, 217	grapevines	1
auxin	25		
<i>Beauveria bassiana</i>	203	heat tolerance	151
berries	1	highbush blueberry	103
berry quality	159	HPLC	41
Bet v 1	197	HPLC-DAD-ESI-MS/MS	15
bioactive	181	human acute consumption	169
bioavailability	65, 113		
biosafety	127	juice	53
black currant	53		
black mulberry (<i>Morus nigra</i> L.)	41	LC-MS/MS	113
blackberries	93	long-cane plants	25
breeding	103, 127	<i>Lygus hesperus</i>	203
brix°	217		
		medicinal	159
cane training	25	microbial control	203
canopy management	25		
charlotte cultivar	15	neoseiulus cucumeris	217
chilling	213	nutritional quality	127
colchicine	135		
cultivars	217	oligomers	181
day neutral	151	phenolic compounds	15
dormancy	213	phenolics	41, 159
drupe	25	phenols	1, 103
		photoperiod	151
endophyte	203	photosynthesis	25
extended season	217	<i>Phytophthora cactorum</i>	79
		plasma antioxidant capacity	169
factorial mating design	103	plasma radical damage	169
flavonoid	41	Polyphenols	53, 181
floricane	25	polyploidy	135
flow cytometry	135	pomace	53
flowering	151	primocane	25
food irradiation	93	processing	53, 65
food microbiology	93		
Fra a 1	197	Q-TOF LC/MS	113
<i>Fragaria</i>	135		
<i>Frankliniella occidentalis</i>	203	recurrent flowering	151
fruit tension	217	remontancy	151

resistance	79	trellis	25
resveratrol	181	<i>Trialeurodes vaporariorum</i>	203
rheological properties	93	type of plants	79
<i>Rubus</i>	25	UV-B radiation	1
<i>Sambucus</i>	159	<i>Vaccinium corymbosum</i> L.	103
stilbenes	181	vegetative propagation	25
strawberries	15	<i>Vitis vinifera</i> L.	1
strawberry	79, 113, 135, 169, 197, 203, 213	winter injury	25
sun damage	25		
<i>Tetranychus urticae</i>	203, 217		
tomato	65
