

Editorial

The present issues, containing two numbers 2s and 3s, are the first special or topical issues of the Journal of Computational Methods in Sciences and Engineering (JCMSE). Here, the letter 's' is attached to the numbers, 2s and 3s, to indicate the special status of these issues.

I would like to thank Professor Dr. Dževad Belkić, the Guest Editor and the Associate Editor-in-Chief in JCMSE, for his editorial work in helping completion of the special issues 2s and 3s. Likewise I thank Dr. Karen Belkić, a member of the Editorial Board in JCMSE, for her editorial participation to these special issues.

T.E. Simos
Editor-in-Chief JCMSE
