

Author Index Volume 1 (2013/2014)

Almeida, M.S.S., J.R.M.S. Oliveira, K.I. Rammah and P.C. Trejo, Investigation of bearing capacity factor of T-bar penetrometer at shallow depths in clayey soils	1–12
Basu, D., R. Salgado and M. Prezzi, A new framework for analysis of laterally loaded piles	53–67
Consoli, B.S., see Winter, D.	95–100
Consoli, N.C., see Winter, D.	95–100
Fellenius, B.H., An instrumented screwpile load test and connected pile-group load-settlement behavior. Discussion of a paper by VanImpe, P.O., VanImpe, W.F., and Seminck, L., 2013. Journal of Geo-Engineering Sciences, IOS Press, 1(1) 13-36	101–108
Mandolini, A., see Mascarucci, Y.	37–51
Mascarucci, Y., A. Mandolini and S. Miliziano, Effects of residual stresses on shaft friction of bored cast <i>in situ</i> piles in sand	37–51
Mezzomo, S., see Schnaid, F.	69–81
Miliziano, S., see Mascarucci, Y.	37–51
Natarajan, N. and G. Suresh Kumar, Numerical modelling of colloidal transport in fractured porous media with double layered fracture-skin	83–94
Oliveira, J.R.M.S., see Almeida, M.S.S.	1–12
Passini, L., see Schnaid, F.	69–81
Prezzi, M., see Basu, D.	53–67
Rammah, K.I., see Almeida, M.S.S.	1–12
Rilho, A.S., see Winter, D.	95–100
Salgado, R., see Basu, D.	53–67
Schnaid, F., L. Passini, F. Stracke and S. Mezzomo, On the response of fluidized piles from laboratory model tests in granular soils	69–81
Seminck, L., see Van Impe, P.O.	13–36, 109
Stracke, F., see Schnaid, F.	69–81
Suresh Kumar, G., see Natarajan, N.	83–94
Trejo, P.C., see Almeida, M.S.S.	1–12
Van Impe, P.O., W.F. Van Impe and L. Seminck, Discussion of an instrumented screw pile load test and connected pile group load settlement behavior	13–36
Van Impe, P.O., W.F. Van Impe and L. Seminck, Discussion of an instrumented screwpile load test and connected pile-group load-settlement behaviour. - Authors' reply to the discussion by Fellenius, B.H.	109
Van Impe, W.F., see Van Impe, P.O.	13–36, 109
Winter, D., A.S. Rilho, B.S. Consoli and N.C. Consoli, A prompt procedure for prediction of strength in artificially cemented soft soils	95–100
