

Keyword Index Volume 1 (2012)

| | | | |
|---|----------|---|---------|
| 17q12 deletion | 135 | developmental delay | 247 |
| 22q11.2 | 115 | developmental differences | 143 |
| 4p monosomy | 33 | DiGeorge syndrome/valocardiofacial syndrome | 115 |
| 4q terminal deletion syndrome | 189 | disease | 161 |
| 9p deletion | 195 | disease loci | 209 |
| abdominal wall/abnormalities | 235 | drug | 79 |
| ADHD | 103 | Duane retraction syndrome | 195 |
| age of onset | 39 | duplication | 115 |
| amniocentesis | 243 | duplication 3q13.11q23 | 143 |
| anal atresia | 55 | dysmorphism | 195 |
| array analysis | 209 | epilepsy | 175 |
| array CGH | 247 | esophageal atresia | 55 |
| array comparative genomic hybridization | 47 | Ewing tumors | 181 |
| arteriovenous fistula | 125 | facial dysmorphism | 175 |
| arteriovenous malformation | 125 | fetus/pathology | 235 |
| association | 39 | FISH | 63, 239 |
| association study | 161 | fused teeth | 25 |
| autism | 115 | GAD antibody | 131 |
| autosomal recessive disorders | 217 | genetic | 13, 161 |
| baroreflex failure | 199 | genetic association | 103 |
| biotinidase deficiency | 153 | genetic counseling | 217 |
| birth weight | 229 | genetic variants | 229 |
| capillary malformation | 125 | genetics | 7, 79 |
| caries | 25 | genitourinary malformations | 209 |
| cataracts | 15 | genotype | 221 |
| China | 39 | genotype-phenotype correlation | 135 |
| chromosomal aberration | 33, 189 | glycemia | 229 |
| chromosomal abnormalities | 175 | Goldenhar syndrome | 71 |
| chromosome | 195, 205 | growth chart | 33 |
| complete urorectal septum malformation | 59 | growth deficiency | 33 |
| congenital malformations | 175 | GWAS | 85 |
| consanguineous marriage | 217 | HDL | 85 |
| copy number variation | 47 | hepatocyte nuclear factor 1beta gene deletion | 135 |
| cordocentesis | 243 | heritable | 161 |
| cystic fibrosis | 221 | heterotaxia | 55 |
| de novo | 143 | HLA | 131 |
| Dent-2 disease | 15 | | |

| | | | |
|--|------------------|---|-----|
| incidence | 71 | prenatal diagnosis | 243 |
| India | 221 | prevalence | 71 |
| interstitial deletion chromosome 4(q31q32) | 189 | protein expression | 181 |
| inv dup (15) syndrome | 63 | proximal tubulopathy | 15 |
| karyotype | 175, 247 | quantitative assay | 99 |
| knowledge translation | 7 | <i>RASA1</i> | 125 |
| laminins | 229 | real time PCR | 99 |
| LDL | 85 | recurrence risk | 247 |
| limb defects | 235 | restricted articular function | 205 |
| limb-body wall complex | 235 | ring chromosome 15 syndrome | 63 |
| lipid | 85 | safety | 79 |
| lipid profile | 229 | schizophrenia | 39 |
| longitudinal studies | 143 | screening | 13 |
| macrodontia | 25 | SGA | 103 |
| matrix metalloproteinase | 181 | short stature | 239 |
| medicine | 79 | single nucleotide | 39 |
| medulloblastomas | 181 | single stranded conformation polymorphism | 221 |
| mental retardation | 15, 63, 115, 175 | situs inversus | 55 |
| microarray | 135 | skeletal anomalies | 205 |
| microduplication | 47 | SMA | 99 |
| Moebius syndrome | 199 | SMN1 | 99 |
| molecular diagnosis | 221 | SNP | 103 |
| mosaicism | 239 | speech | 115 |
| multiplexed genotyping | 153 | speech and language impairment | 47 |
| mutations | 221 | sweat chloride | 221 |
| neural cell adhesion molecules | 39 | syndrome | 71 |
| neurofibromatosis type 1 | 25 | tetraploidy | 243 |
| newborn screening | 153 | TG | 85 |
| next generation sequencing | 209 | thoracic wall/abnormalities | 235 |
| <i>NF1</i> gene deletion | 25 | tic behavior | 115 |
| <i>OCRL</i> gene | 15 | tigroid appearance | 247 |
| oculoauriculovertebral | 71 | toxicity | 79 |
| patent urachus | 59 | tracheoesophageal fistula | 55 |
| PCR | 221 | trisomy 8 | 205 |
| pediatrics | 7, 13, 79 | type 1 diabetes | 131 |
| pharmacogenetics | 79 | umbilical cord cyst | 59 |
| phenotype | 189, 221 | Williams syndrome | 135 |
| phenotype specification | 143 | Wolf-Hirschhorn syndrome | 33 |
| policy | 7 | Y chromosome | 239 |
| polymorphism | 39 | <i>ZIC3</i> gene | 55 |
| pregnancy | 235 | | |
| prenatal | 13 | | |
