

Supplemental Fig 1: Box plots comparing log-scale normalized gene expression between African American (green) (N=15) and caucasian (red) (N=100) patients in the Nanostring dataset.

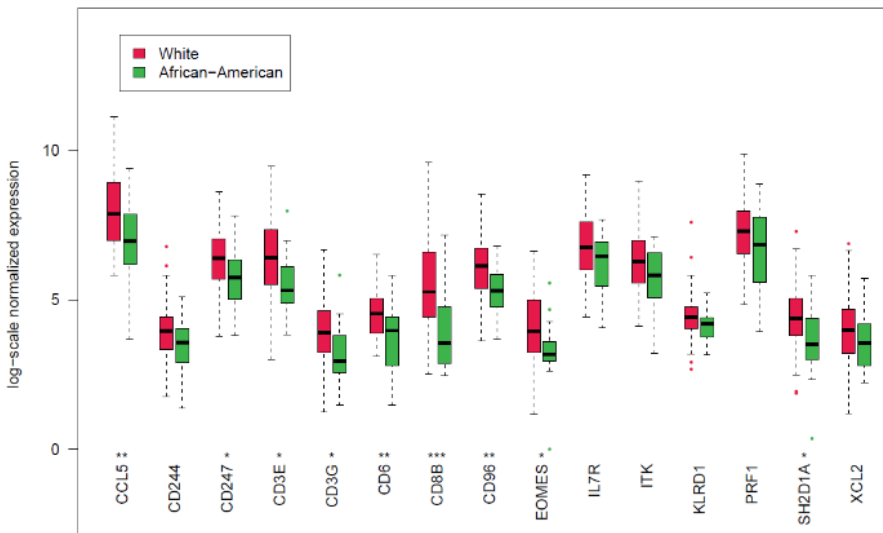

A. IMmotion150 Teff signature

B. KN-427 18-gene T-cell inflamed gene expression profile

C. Javelin101 Renal 101 Immuno signature

* p ≤ 0.05
 ** p ≤ 0.01
 *** p ≤ 0.001

Supplemental Fig 2: Box plots comparing log-scale normalized gene expression between high stage (stage II-IV, blue) (N=253) and low stage (stage I, yellow) (N=259).
