<sup>b</sup>Neurology Service (127), Pittsburgh (University Drive), Veterans Affairs Medical Center, Pittsburgh, PA, USA

Received 27 August 1996

Fig. 5A (*bcl-2* immunocytochemistry from normal brain) is reproduced from Chen, J., Zhu, R.L., Nakayama, M., Kawaguchi, K., Jin, K., Stetler, R.A., Simon, R.P. and Graham, S.H., The apoptosis-effector gene, *Bax*, is expressed in vulnerable hippocampal CA1 neurons following global ischemia, *J. Neurochem*, 67 (1996) 64–71.

The Publisher regrets that due to an unfortunate error this Corrigendum was published in the previous issue of *Restorative Neurology and Neuroscience* as a correction to the wrong article.
