

## From the Editor

---

We are proud to present our special issue “The Assessment of Assistive Technology Outcomes, Effects and Costs”. Many thanks to our guest editors Gert Jan Gelderblom and Luc de Witte, who did a lot of work in creating the schema for this special issue. Also, much credit must go to the reviewers, Prof. Dr. M. Fuhrer (Health Scientist Emeritus, National Institutes of Health, USA) and Dr. M. Post (iRv-Hoensbroek, The Netherlands). Much tedious and high level work

was done by them.

The topic is very important for innovation in Assistive Technology and we hope that readers will be stimulated to open discussions and write further research and application oriented papers.
