Technology and Disability 24 (2012) 319–320
IOS Press

Keyword Index Volume 24 (2012)

accessibility 129, 247
aids 9
Alzheimer's disease 139
assessment 49, 129
assisted navigation 163
assistive robots 263
assistive technology 49, 83, 93, 117, 139, 181, 193, 211, 263
assistive technology devices 9, 59
assistive technology services 59
awareness 139

barriers 149

caregivers 303
children 83
classification 59
clinical evaluation 273
communication robot 263
community care networks 219
computer mouse 117
cost-effectiveness analysis 93

definition 181
delivery of health care 71
dementia 103, 139
development invention 187
development methodology 263
development of assistive technology 273

eHealth 103
elderly people 303
empowerment 219
EQ-5D 93
equipment 9
ethics 205
evidence 9

facilitators 149
family caregivers 219
field-based innovation 263
frail elderly 283
frail older adults 219

guidance 163

health care 9
HUI3 93
human-centred design 193
human-computer interface 117

implementation 103
input device 117
instruments development 293
internet 149

knowledge transfer 233
knowledge translation 187

life habits 49
loneliness 283
long term conditions 233

measurement instrument 83
medical device 205
MEMS-gyroscope 117
methods 193
mobility 293
mobility disability 71
models 181
motor disabled 117
motor impairment 117
multimedia 219

need analysis 163

outcome assessment 9
outcome measure 49
outcomes 83
outcomes assessment 293
outcomes research 59
