Haim Brezis (1944–2024)

Roger Meyer Temam

Indiana University, Bloomington, USA
E-mail: temam@iu.edu

We were very saddened to hear of the passing away of Haim Brezis on July 7, 2024.

He was an active collaborator of *Asymptotic Analysis* for many years and had a deep influence worldwide on Functional Analysis and nonlinear partial differential equations. The obituary that appears in this issue, written by Henri Berestycki and Jean-Michel Coron, highlights some aspects of his work.

We present our most sincere condolences to his family and friends.
