

Author Index Volume 99 (2016)

The issue number is given in front of the page numbers.

- Colli, P. and L. Scarpa, From the viscous Cahn–Hilliard equation to a regularized forward-backward parabolic equation (3,4) 183–205
- Colombini, F., V. Petkov and J. Rauch, Eigenvalues for Maxwell’s equations with dissipative boundary conditions (1,2) 105–124
- de Dieu Zabsonré, J., see Roamba, B. (3,4) 207–239
- Fukao, T., Convergence of Cahn–Hilliard systems to the Stefan problem with dynamic boundary conditions (1,2) 1– 21
- Gao, J.-l., see Zhang, F.-h. (3,4) 241–262
- Griso, G., A. Migunova and J. Orlik, Homogenization via unfolding in periodic layer with contact (1,2) 23– 52
- Matthies, K. and H. Uecker, Low regularity justification results for envelope approximations of nonlinear wave packets in periodic media (1,2) 53– 65
- Michalik, S. and B. Podhajecka, The Stokes phenomenon for certain partial differential equations with meromorphic initial data (3,4) 163–182
- Migunova, A., see Griso, G. (1,2) 23– 52
- Mohan, M.T. and S.S. Sritharan, Stochastic Euler equations of fluid dynamics with Lévy noise (1,2) 67–103
- Nguyen, P., see Pham, D. (1,2) 125–161
- Orlik, J., see Griso, G. (1,2) 23– 52
- Petkov, V., see Colombini, F. (1,2) 105–124
- Pham, D. and P. Nguyen, Stochastic systems of diffusion equations with polynomial reaction terms (1,2) 125–161
- Podhajecka, B., see Michalik, S. (3,4) 163–182
- Rauch, J., see Colombini, F. (1,2) 105–124
- Roamba, B., J. de Dieu Zabsonré and S. Traoré, Formal derivation and existence of global weak solutions of a two-dimensional bilayer model coupling shallow water and Reynolds lubrication equations (3,4) 207–239
- Scarpa, L., see Colli, P. (3,4) 183–205
- Sritharan, S.S., see Mohan, M.T. (1,2) 67–103
- Traoré, S., see Roamba, B. (3,4) 207–239
- Uecker, H., see Matthies, K. (1,2) 53– 65

- Wang, L.-h., see Zhang, F.-h. (3,4) 241–262
- Zhang, F.-h., L.-h. Wang and J.-l. Gao, Attractors and asymptotic regularity for nonclassical diffusion equations in locally uniform spaces with critical exponent (3,4) 241–262
