

Keyword Index Volume 5 (2016)

3D cell culture	155	FT-IR spectroscopy	295
antimicrobial photodynamic activity	207	FTIR	145, 185, 269
arsenic	373	FTIR difference spectroscopy	185, 231
ATR-IR	89	FTIR imaging	155
bacteriorhodopsin	231	FTIR spectroscopy	101
Bangladesh	373	functional groups	359
beta-lactoglobulin	197	genomic DNA	295
biological thermal modeling	347	grapevine varieties	295
blood components	175	ground state destabilisation	101
body fluids	27	H/D exchange	185
Bovine Serum Albumin (BSA)	197	H ₂ ¹⁶ O/H ₂ ¹⁸ O exchange	185
cancer cell cultures	41	HDFM spectral signature	175
carbohydrate molecular structure	359	heat transfer in biological tissue	347
celiac disease	27	high throughput	145
cell analysis	115	HT-FTIR spectroscopy	129
cell membrane analysis	175	hydrogels	41
chemometrics	359	ICP-MS	373
co-products from bio-oil processing	359	<i>in vivo</i> and <i>in toto</i>	71
combined LIF-OCT	313	<i>in vivo</i> spectroscopy	217
conditioning temperature and time	359	in-vitro nuclear magnetic resonance spectroscopy	27
confocal microscopy	115	infrared imaging	145, 325
conformational change	101	infrared spectroscopy	101, 231, 325
copper and zinc ions	197	instrumentation	115
depth-sensitive fluorescence spectra	313	internal water molecules	185
diet	373	intestinal mucosal biopsies	27
diffusion imaging	41	isopiestic method	185
disease pattern recognition	129	keratin	207
drug development	101	layered tissue	313
dual-modal system	313	lipid	167
dynamic light scattering	197	magnetic resonance imaging	41
electron magnetic resonance	5	membrane protein	167
electron paramagnetic resonance	5	membrane proteins	231
electron spin resonance	5	metabolome	55
electron transfer	269	metabonomics	27
enzyme mechanism	101	microscopy	115
essential oils formulations	89	microwaves irradiation	295
exchangeable protons	185	molecular distribution	175
extracellular matrix	155	MRI	283
fMRI	283	MRO	283
fNIRS	283	multivariate statistical analysis	217
free radicals	5		

NA	313	Raman	115
NIRS	283	Raman spectroscopy	197, 207, 217, 231
NMR analysis	55	reactive oxygen species	207
noise reduction	325	redox potential	269
non-invasive	71	retinal	231
non-invasive clinical diagnosis	347	rhodopsin	231
non-small-cell lung cancer	129		
		saliva	55
optical design	115	salivary metabolites	55
optoacoustic	71	screening nicotinamide	89
		selenium	373
PCA	217	sentinel lymph nodes (SLN)	71
pelleting	359	SERCA1a	101
pelvis	283	serum	129
permeation through membrane	89	site directed spin labeling	5
phosphate transfer	101	skin	217
phosphoenolpyruvate	101	small sided game	55
phosphoenzyme	101	soccer	55
phosphorylation	101	spectral histopathology	325
photoacoustic	71	spectral library	175
photonic biofluid diagnostics	129	spectroelectrochemistry	269
photoreceptor	167	spectroscopy	115
photosynthesis	269	spin labeling	5
plasma	129	SPIONS	71
prolapse	283	substrate distortion	101
protein microarray	145		
protein structure	145	Taxol	41
protonation dynamics	167	thermography	347
prototypes	115	time-resolved FTIR	167
pyruvate kinase	101	total dietary intake	373
quinone	269	vibrational spectroscopy	101
		voiding dysfunction	283
