EDITORIAL: SOFTWARE SURVEY SECTION

The introduction of the new Software Survey Section to BIORHEOLOGY is to encourage the open exchange of information on software programs unique to our professional field. With the rapid penetration of computers into academic and industrial institutions has come a parallel increase in the number of scientists and researchers designing their own software. The existence of much of this software remains unknown to even those of us who could most benefit from its use. We believe that it is of vital importance to our readers that such information be made available. We believe also that a professional journal is the best place to share such information. Your contribution would be most welcome.

The questionnaire on the following pages is designed to assist you in reporting on software that you may have developed or be in the process of developing. By completing this form, your information will reach thousands of your colleagues who may benefit from your work and may possibly offer suggestions for further enhancements to your software. Please complete the enclosed form and return it to:

Dr. A. L. Copley Biorheology Polytechnic Institute of New York 333 Jay Street Brooklyn, NY 11201, U.S.A.

We do not intend to review or comment on the contents of the questionnaire. It will be published as is in order to expedite the information cycle process. I would welcome any comments you may have.

THE EDITORS

NAME OF JOURNAL	BIOF	RHEOLOGY					
	PERGAM SOFTWARE DE						
Title of software page	:kage:						
It Is: []Applicati	on program []Utility	[]Other_				
Specific area (e.g. Thermodynamic	s, Inventory Cont	ro1)					
Software developed fo	or [name of comput	er(s)]					
in [language(s)]							
to run under [operati	ng system]						
and is available in t	he following medi	a:					
[] Floppy disk/dis	• •	_	.	_		_
