#### **SCIENTIFIC PROGRAM**

The Congress consists of Invited Lectures, Symposia, Free Communications, Poster Presentations, Film and Video Sessions.

The Main Topics of the Congress are:

1. Cell Biorheology
2. Rheological and Physico-Chemical Aspects of Cell Interactions
3. Cell Aggregation and Adhesion
4. Molecular Biorheology
5. Transport Phenomena
6. Blood Rheology
7. Cellular and Molecular Aspects of Mucus and Cilia
8. Rheology of Blood Vessels and of Organs
9. Biorheology of Bone, Cartilage and Ligament
10. Muscle Cell Biorheology
11. Plant Biorheology
12. Biorheology of Growth
13. Thrombosis - Platelets and Endothelial Cells
14. Biorheology of Blood and the Vessel Wall and the Microcirculation
15. Biorheology related to Artificial Organs
16. Biocompatibility and Biomaterials
17. Clinical Applications of Biorheology
18. New Developments in Clinical Hemorheology
19. Methods in Clinical Biorheology
20. Biorheology and Pharmacology

#### **CONGRESS LANGUAGE**

The official language is English. There are no simultaneous translations.
