**Papers**

- Dihydroergocryptine maintains erythrocyte fluidity in acidic and hyperosmolar buffer solutions modelling hypoxic and ischemic microcirculation
- Longitudinal study of relationships between red cell aggregation at rest and lactate response to exercise after training in young gymnasts
- Rheological anomaly of neutrophils in Behçet's disease by suspension filtration time through a nucleopore filter
- Quantitative rheological evaluation of the effect of naftidrofuryl on disorders of the cerebral microcirculation
- Quantitative evaluation of erythrocyte viscoelastic properties from diffractometric data: Applications to hereditary spherocytosis and hemoglobinopathies
- Relationships between blood rheology and transcutaneous oxygen pressure in peripheral occlusive arterial disease
- Maximal oxygen uptake and lactate thresholds during exercise are related to blood viscosity and erythrocyte aggregation in professional football players
- Effects of a standardized breakfast compared to fasting on the hemorheologic responses to submaximal exercise

221 Buflomedil prevents ischaemia-dependent changes in blood rheology and neutrophil reactivity. A possible adenosine-mediated mechanism

Abstracts

235 Abstracts of papers presented at the annual meeting of the German Society for Clinical Microcirculation and Hemorheology

Dissertation Abstract

G.-F. von Tempelhoff

261 Alterations in the clotting system and hemorheology in gynecologic malignancies

Announcements

M.R. Hardeman

263 Call for sending in dissertations, book (chapters), etc.

T. Di Perri

264 9th European Conference on Clinical Haemorheology, 29 June–1 July 1995, Sienna, Italy

G.B. Nash

Megha Singh

Letter to the Editors-in-Chief

E. Ernst, H. Meiselman, M. Boisseau and G. Nash

269 Co-operation between societies in clinical haemorheology

271 Contents of Biomechanics Volume 31, Number 6
