

## Notice of retraction

---

IOS Press has retracted the following publication from its online content: [Cancer Biomarkers, 23(1) (2018), 9–22]  
DOI: 10.3233/CBM-171002

### **lncRNA GHET1 down-regulation suppresses the cell activities of glioma**

<sup>b</sup>Department of Neurosurgery, Yunnan Cancer Hospital, Kunming 650118, Yunnan, China

<sup>c</sup>Department of Neurosurgery, Yunnan Cancer Center, Kunming 650118, Yunnan, China

The above article originally published in Cancer Biomarkers volume 23, number 1, 2018, pp. 9–22 has been retracted in consultation between the corresponding author and the publisher of Cancer Biomarkers. It was found in further research that there are other more complex mechanisms involved in the LncRNA GHET1 regulation of development of glioma. In order to ensure the scientificity and integrity of the research, the journal has decided to retract it from its online catalogue.
