Retraction to: Knockdown of USP39 by lentivirus-mediated RNA interference suppresses the growth of oral squamous cell carcinoma

IOS Press has retracted the following publication from its online content:
[Cancer Biomarkers, 16(1) (2016), 117–144, DOI: 10.3233/CBM-150549]

Knockdown of USP39 by lentivirus-mediated RNA interference suppresses the growth of oral squamous cell carcinoma
Ke-Yi Li*a,b,c, Jie Zhangd, Li-Cheng Jiangb,c, Bin Zhanga,b,c, Chun-Peng Xiah,c, Kai Xuh,c, Hai-Ying Chenb, Qiao-Zhi Yangh,c,*, Shu-Wei Liu*a and Hong Zhue
aDepartment of Anatomy, Shandong University School of Medicine, Jinan, Shandong, China
bDepartment of Oral and Maxillofacial Surgery, Liaocheng People’s Hospital, Liaocheng, Shandong, China
cKey Lab of Oral and Maxillofacial Medicine, Liaocheng People’s Hospital, Liaocheng, Shandong, China
dDepartment of Pathology, Liaocheng People’s Hospital, Liaocheng, Shandong, China
eDepartment of Stomatology, Beijing Pediatric Hospital, Beijing, China

The editorial office was contacted by researchers claiming that the article reported wrongly identified nucleotide sequence reagents [1]. Assessment by the Editor-in-Chief found that the claim has significant impact on the article’s conclusions, which would need rectification. Unfortunately, the authors did not respond despite several attempts; therefore the article has been retracted.
