

Editorial

This Special Issue represents Part II of the Proceedings of the Seventh International Congress of Biorheology, held at Nancy, France from 18-23 June 1989. It deals with communications presented in the following two Symposia: 'Methods in Clinical Hemorheology', edited by Siegfried Witte with an introduction by him, and 'Hemorheology and Cardiovascular Diseases', edited by L. Dintenfass and Y. Isogai. The paper by T. DiPerri, belonging to the latter Symposium, will be published in a forthcoming issue of CLINICAL HEMORHEOLOGY.

Since the Symposium, chaired by S. Witte, concerns also experimental hemorheology, it will be published accordingly in a forthcoming issue of BIORHEOLOGY, containing Part III of the Proceedings.
