

## Editorial

---

The Annual Bibliography of publications on education and training for librarianship and information work did not appear in the early volumes of *Education for Information*; the Bibliography was launched in 1987, the journal's fifth year. It was published in issue 4, included 421 items and, the editors then hoped, "will prove an important weapon for educators and trainers in their continuous battle on the current awareness front and ... will be the first of a series of annual bibliographies devoted to this important international topic."

It is for you the readers to comment upon the first hope. As regards the second, the Bibliography has continued to appear regularly each year in the third issue of each volume and, as is the way with bibliographies, to expand in coverage. The editors are grateful to Alan Clark for his annual labour in compiling the Bibliography and for making it an important ingredient in the success of *Education for Information*.
