### Appendix 3: North American iSchool Website Survey Data

This table presents the additional data collected during our North American iSchools website survey. We wanted to understand the relationship between DH at each university and the engagement level of the iSchool with DH at that university. Our website searches specifically looked for the term “Digital Humanities” when seeking official programs, courses, and faculty interests. Note that the final two categories (DH courses and Faculty) will exist for iSchools that have their own DH program (see tables in the main text).
