

## THE SWEDISH RATING LIST

ICCA Communication

*Göran Grotting*

Continuing our policy this issue contains the latest version of the Swedish Rating List. Only one newcomer has entered the list, viz. the Excel Mach III, starting at the third rank, at once! All games were played at 40 moves in two hours by members of the Swedish Chess Computer Association (SSDF). As usual, '+ -' denotes the half-width of a 95% confidence interval on the rating, 'games' stands for the number of games on which the rating is based and 'against' stands for the average rating of opponents. By elementary methods wider (> 95%) or narrower (< 95%) confidence intervals may be derived by referring to Gaussian statistics.
