

PROCEEDINGS OF THE ACC8 CONFERENCE

On June 27-28, 1996 the 8th *Advances in Computer Chess Conference* was held in Maastricht, The Netherlands. The invited lectures were held by IGM D. Bronstein and K. Thompson. Moreover, seventeen selected lectures on various aspects of computer chess were presented by leading researchers in the field.

All papers will be published in book form in early 1997 under the editorship of H.J. van den Herik and J.W.H.M. Uiterwijk. Its price through regular channels will be Dfl. 135.- (approximately \$ 81.- in the US).

To members of the ICCA the book is offered at the price of Dfl. 120.- (or US \$ 72.-), inclusive of postal delivery costs, if ordered before January 31, 1997. It is to our common advantage to combine your order with the renewal of your membership, since this will reduce banking fees. The usual conditions apply: your transfer should either be *net* to the ICCA or the amount should be increased to compensate for banker's fees to be incurred by us.

A simple mention "Proceedings ACC8" will effect your order. The book will be sent as soon as published to the address at which you receive the Journal. Should an other mailing address be used instead, please clearly state so.
