

## THE SWEDISH RATING LIST

ICCA Communication

*T Karlsson and G Grotting*

Continuing our policy, this issue contains the latest version of the Swedish Rating List. All games were played at 40 moves in two hours by members of the Swedish Chess Computer Association (SSDF). The '+' denotes the upward 95% confidence interval, the '-' denotes the downward 95% confidence interval on the rating, 'games' stands for the number of games on which the rating is based and 'against' stands for the average rating of opponents. By elementary methods wider (>95%) or narrower (<95%) confidence intervals may be derived by referring to Gaussian statistics.
