Intelligent Data Analysis 18 (2014) 1235–1238
IOS Press

Keyword Index Volume 18 (2014)

ad creative 1199
algorithm analysis 261
alternating direction method 1137
animal feed quality monitoring 25
APMM stability measure 389
apriori algorithm 637
association analysis 739
association mining 637
association rule mining 217, 243, 479
attribute reduction 429
attribute selection 819
automated algorithm design 63
automated campaign management 1199

back-propagation neural networks 449
Bayesian network 157, 281
Bayesian network classifier 3
belief clustering 409
biclustering 837
big data 117
binary decision diagram 889
bitrate estimation 465
byte-level n-gram 677

chance threshold 243
change detection 181
churn prediction 3, 95
class imbalance 203, 1089
classification 63, 95, 203, 697, 739, 1089, 1109
classifiers 911
cluster cohesion 409
cluster evaluation 389
cluster separation 409
clustering 137, 181, 479, 531, 547, 793, 857, 973
clustering approach 1109
clustering differential privacy 583
clustering ensemble 389
collaborative filtering 953, 973
collaborative tagging 953
community discovery 495
component-based algorithms 63
concept drift detection 337
conic quadratic programming 79
consensus matrix 531
constrained learning 927
constraint-based mining 837
continuous optimization 79
convex optimization 1137
convexity 79
cooperative learning 511
Cophenetic correlation coefficient 547
credit assignment 511
critic learning 511

data analysis 1013
data and knowledge visualization 873
data generation 761
data mining 531, 583, 609, 637, 697, 793, 1013, 1109, 1177
data privacy 365
data set characteristics 449
data stream 181, 337
decision tree 63, 857
dendrogram 547
density estimation 157
description matrix 547
discrete 583
distributed optimization 1137
divergence 25
diversity 1067
dynamic clustering 409

eigen-space update 927

1088-467X/14/$27.50 © 2014 – IOS Press and the authors. All rights reserved

encoder rate control 465
ensemble learning 95, 857, 1089
episode mining 761
event sequences 997
evolutionary algorithm 63
evolutionary search 25
expertness framework 511
extended evidence accumulation clustering 389

feature extraction 465, 927
feature reweighting 561
feature selection 319
feature supervision 561
fisher exact test 243
frequent item set mining 997
frequent itemsets 1027
frequent pattern mining 637
frequent positive and negative itemset 1049
function approximation 1153
fuzzy clustering 157, 1153
fuzzy K-nearest neighbor 429
fuzzy rough set 429

Gaussian process 319
gene expression data 837
gene selection 739
gene-function prediction 717
genetic algorithms 1199
genetic clustering algorithms 819
Google AdWords 1199
graph anonymization 365

Haar wavelet transform 583
harmfulness 203
hierarchical clustering 547
hierarchical clustering combination 547
hierarchical multi-label classification 717
hierarchy 531
high dimension 157
Hoeffding bound 337
Hungarian method 531
hyperspectral band selection 25
hyperspectral image cubes 25

imbalanced data 95
imbalanced ratio 203
incremental mining 1013
instance selection 429
integer programming 43
integrative 739
interactive clustering 561
interactive feature selection 561
interactive multidimensional data visualization 117

k value prediction model 449
keyword selection 1199
K-nearest neighbor 429
kNN classifier 677
k-NN classification algorithm 449

label dependency 911
land covers 305
large datasets 793
LDA 1067
length principle 889
linear discriminant analysis 927
linear models 79
local discriminative subspaces 319
local ICA 157
lognormal distribution 1067
log-normality 1067
loss function 697

machine learning 697
matrix completion 1137
maximal frequent U2 patterns 653
maximum profit criterion 3
mean shift outliers 79
meta learning 95, 261
methodologies and tools 873
metric embedding 365
microarray data 739
minimum description 889
mining methods and algorithms 609
missing data 1177
missing-data mechanism 1177
model validation 873
model-based techniques 973
models 79

MU2P-Miner 653
multi-agent systems 511
multiclass imbalanced datasets 1109
multilabel classification 911, 1137
multiple minimum supports 1027
multivariate microaggregation 819

naıve Bayes 261
nearest neighbor classifier 319
negative association rule 243, 1049
negative itemset 1049
network flow 43
news relation discovery 217
NMF 495
nodes importance evaluation 495
noise 511
novelty detection 181

one-class classification 889
online advertising 1199
online learning 927
optimization 697
outlier detection 1049
outlier observation 79

parallel episodes 997
parallel spike trains 997
pattern mining 761
pay-per-click advertising 1199
prediction intervals 873
privacy preservation 281
probabilistic 911

quality evaluation 761
questionnaire data 479

random subspace method 1089
rank-order mismatch 217
rare frequent itemsets 1027
RBF networks 261
recommender systems 953
recursive feature elimination 25
reflectance analysis 25
region-based ranking 217
regression 873
reinforcement learning 1153
request trajectory pattern 637
reusable components 63
robotic soccer simulation 973
rough set 429
rule ensembles 857

sampling approach 1109
sampling method 1089
satellite image classification 305
scatter matrix based class separability measure 203
scatter matrix update 927
segmentation 305
semi-supervised learning 857
sensitive information 281
sensitive XML association rules 281
sensitivity 1067
sequential data 137
sequential pattern 1013
sessionization 43
similarity upper approximation 137
sliding window 337
social tagging 953
spatial data analysis 305
spatial/temporal databases 609
spike synchrony 997
sporadic rules 243
stability 1067
stability indices 531
stability-based algorithm 531
star-coordinate models 117
state abstraction 1153
statistics 79
support vector data description 95
support vector machines 95, 717, 973
support vector regression 465

tabular data anonymization 365
temporal neighborhoods 609
text categorization 677
text classification 911
text mining 217
textual advertising 1199
time series 793

topic models 1067
transfer learning 1153
Transferable Belief Model (TBM) 409
transition regions identification 305

U2GenMax 653
U2MAFIA 653
uncertainty 305, 409
univariate uncertain data 653
unsupervised learning 181
user supervision 561
utility mining 1027

validity measure 531
visual cluster analysis 117

wavelet transforms 583
web server logs 43
web usage data 137
web usage mining 43
web user 43
weighted directed network 495
Wyner-Ziv (WZ) video coding 465

XML 281
