Intelligent Data Analysis 20 (2016) 1511–1514
IOS Press

# Keyword Index Volume 20 (2016)

1-PDTSP 1133

a hierarchical grouping S5
academic performance 933
accumulative vector S83
adaptive color model S121
adaptive learning 257
aggregate cell 1351
aggregation operator 281
Android app for ECG analysis 575
ant colony optimization (ACO) 1021
approximation 723
assessment method 1267
association rule hiding 495
association rule mining 105
attribute reduction 317
attribute weights 1247
automated analysis 1181
averaging operator 281

bag of little bootstraps on features 1085
bag of visual words S95
bagging 357
bat algorithm 105
Bayesian networks 933
behavior modeling 417
benchmark experiments 439
benchmark generation 615
big data 597
binary classification 1307
binary discernibility matrix 317
binary key representation S83
binary matrix factorization 783
binary partition 915

bottom-up inductive logic programming 745
brain-computer interface (BCI) 67
business process management 515

camera network tracking 679
cascading randomized weighted majority 877
change detection 1329
Choquet integral 809
classification 5, 1021, 1085, 1285, S109
cluster S5
cluster analysis 561
cluster boundary 29
cluster ensemble 561
cluster validity index 853
clustering 439, 1061, S5
coevolution 129
Complex network 809
complex SVM S109
compression 997
concept drift 257, 1329
confidence criterion 67
conformal geometric algebra S69
continuous ad-hoc aggregate queries 1351
curse of dimensionality 83

data cleaning 979
data mining 339, 395, 561, 915, 1021, 1101, 1133, 1157, 1385
data privacy 543
data reduction 1021
data stream 223, 1329, 1351
data-association S141
DBSCAN 377
decision fusion 1267
decision tree 767
delaunay triangulation S95
dictionary learning 1405
diffusion maps 637
digital image forensics S17
discriminative analysis 701

1088-467X/16/$35.00 © 2016 – IOS Press and the authors. All rights reserved

disjoint graphs 455
distance measures 5
DNA microarray S53
drug-target proteins 183
dynamic clustering 853
dynamic database 655, 891
dynamic graph 825
dynamic prefix tree 1351

ECG classification 575
eigenvector centrality 543
electric distribution network planning 339
electricity load forecasting 1223
EM 933
EMO 495
emotion classification 1477
ensemble learning 281, 877, 1085, 1329
entity resolution 455
environmental sensing 979
Euclidean distance 1285
EVD 997
evolutionary multi-objective optimization 495, S37
exploitation 153
exploration 153
extreme learning machine 1115
eye fixations 377

face detection S141
face recognition 1405
face tracking S141
feature S5
feature extraction from compressed ECG 575
feature reduction S53
feature selection 953, S37
forecasting model 1441
frequent subgraph mining 1181
FUSP tree 655
Fuzzy Krill Herd (FKH) optimization algorithm 153
fuzzy min-max neural network 767

Gaussian cloud learning 167
Gaussian Process classifier 701
gene expression 1425
gene selection 1425
genealogy 455
genetic algorithms 1441
geometric indexing S95
graph analysis 1477
graph classification 825
graph kernel 825
graph matching 637
graph stream 825
graph visualization 417
GRASP 1133
grey theory 1441
grid 1061
grid proximity measure 853
grid-based clustering 853
GSOM 1115

health risk management 293
heuristic 439, 783, 1385
hierarchical clustering 281, 933
high utility itemset mining 1157
high utility itemsets 915
high utility patterns 395
high-dimensional data 29, 1085
high-utility itemsets 891
hough transform S69
human activity recognition 701
Human Drug Network 183
hybrid classifier 767
hybrid metaheuristics 1133
hyper-heuristic approach 953
hypervolume approximation 129

incremental learning 825
inductive logic programming 515
industrial process 1385
influence maximization 199
information entropy 1247
integer programming 1385
internet of things 979
inventory control problem 153
islamic banking 1199

$k$-anonymity 543
$k$-nearest neighborhood relevant outlier factor (*kNNROF*) 1247

K2 933
kernel function 1285
key support count 915
k-means clustering algorithm 597
k-nearest neighbors S37
knowledge discovery 1199
knowledge-based process models 515

$l$-diversity 543
large data set 1061
link prediction 809
local search 783, 953
logistic regression 357, S53

machine learning 561
Mahalanobis distance 1285
maintenance 891
many objective optimization 129
Markov chain 1441
maximal information coefficient 597
maximum entropy discrimination 481
mean S5
median filtering detection S17
memetic algorithms 953
meta-heuristic algorithms 953
micro-blog data 1477
missing data 1267
mixed attributes 29
mobile based telecardiology 575
mobility 1459
model selection 67
molecular dynamics 1181
multiclass classification 1425
multi-dimensional Bayesian network classifiers 257
multi-kernel learning 481
multilayer perceptron 357
multi-object tracking 679
multi-objective 105
multiphase data association 679
multiphase level set 679
multiple scales S17
multiple-perturbations S17
multi-view learning 481
mutual information 1425

negation 745
neighbor heuristic 167
noise node 543
nonlinear multiclass classification 1199
nonlinearity 83
nonmonotonic inductive logic programming 745
Nyström 997

online learning 877, 1115, 1329
open public sector data 339
OPTICS 1061
optimal hyper-plane 1285
optimization 1307
optimum dispersion threshold 377
ordered information systems 723
outlier detection 1247
out-of-sample extension 997

Pareto fronter 105
particle swarm optimization 167, 199, 1223
PC 933
perceptual organization S69
place recognition S95
plug-in hybrid electric vehicle (PHEV) adoption 339
prediction 357
prediction with expert advice 877
pre-large concept 655
principal component analysis S53
privacy preserving data mining 495
probabilistic relational model 615
process mining 515
protein-protein interaction (PPI) networks 637
protein-protein interaction networks 183
prototype generation S37
pruning 1247

$q$-grams S95
quality management 1385
quaternion SVM S109

railway accidents analysis 597
random forests 83, 1199
record deletion 655
reduct 317

relational data representation 615
responsiveness 417
rough set theory 723, 1267
rough sets 317

selection bias 83
self-training 67
semi-supervised learning 1115
sensor network analysis 223
sequential patterns 293, 655, 1101
shadowed set 29
short text analysis 47
Signed social networks 199
silica liquid 1181
single-pass tree construction 395
skin detection S121
skin segmentation S121
smart cities 1459
smart grids 1223
social network 417, 543
sparse coding 1405
spatial analysis S121
spatial-temporal trajectory clustering 377
spatiotemporal data mining 293
spatio-temporal representation S141
speaker recognition S83
stability 767, S5
Standard Krill Herd (SKH) optimization algorithm 153
statistical relational learning 515
stepwise algorithm 83
stock market 357
stream data mining 257, 1157
student evaluation 933
subspace similarity 561
supervised classification 1101
support vector machine (SVM) 67, 701, 1199, 1285, 1307, 1425, S109
support vector regression 83, 1223
SVD 997
swarm intelligence 167
synthetic directional data 439

temporal dependencies 223
temporal information S83
tensor voting S69
time decaying model 1157
time series 5
topic Identification 47
transaction deletion 891
transaction utility list 915
travel time prediction 1459
tree restructuring 395
triangular norm 281

uncertainty measurements 723
unsupervised pattern extraction 1477
utility mining 395
utility-list 891

variable importance score 83
variable selection 83, 1199
variance S5
variational data association 679
video S141

weblog clustering 47
workflow mining 515
