

## Editorial

---

I am happy to present another number of *Intelligenza Artificiale* with several stimulating papers. First of all, this number of the journal includes in the normal track a substantial paper by Lorenza Saitta. The two papers that follow are by AI\*IA awards winners: Elena Bellodi won the 2013 best PhD thesis award named in memory of Marco Cadoli; Andrea Loreggia won the 2013 award for the best master thesis (Premio Neolaureati). Then this number includes the special issue on Intelligent Planning Systems, for which I am grateful to the guest editors Gabriella Cortellessa, Alfonso Emilio Gerevini, Daniele Magazzeni and Ivan Serina and that presents four selected papers in the area. I hope you will enjoy the reading.
