

Editorial

This issue is dedicated to the memory of Carlos Garcia, a pioneer in the clinical investigation of Alzheimer disease. Carlos was a dear personal friend that initiated my appreciation of a Portuguese heritage. All who knew him will always remember his genuine concern for patients, colleagues, and friends. His loss is felt and his friendships treasured by all who knew him.

George Perry
Editor-in-Chief, JAD

Carlos, his wife Elaina, and the editor in City Hall, Stockholm, Sweden in 2002.
