On page 288, in Fig. 2, the images for C and D were reversed, and the labelling on D should be  $p < 0.1$  rather than  $p < 0.01$ . For consistency the labelling on B has been changed to  $p < 0.1$  (prom  $p = 0.06$ ) and a minor inaccuracy in the R value in B has been rectified (R value of 0.56 instead of 0.55).
