On page 1105, there was an error in the second paragraph of the “Methods” section, “Study Design, participants, and measurements”. The first sentence of the second paragraph states:

“We included participants who had ≥ 1 measurement of cognition and ≥ 1 measurement of BP at or before the first cognition measurement.”

The sentence should instead read as follows:

“We included participants who had ≥ 1 measurement of cognition and ≥ 1 measurement of BP before the first cognition measurement.” This correction pertains to the description of our analytic sample and does not affect the results of the study or their interpretation.
