# Retraction to: Potential Mechanisms Linking Cholesterol to Alzheimer's Disease-like Pathology in Rabbit Brain, Hippocampal Organotypic Slices, and Skeletal Muscle

Pre-press 1 March 2024

IOS Press has retracted the following publication from its online content:  
[Journal of Alzheimer's Disease, 15(4) (2008), 673–684, DOI: 10.3233/JAD-2008-15412]

### **Potential Mechanisms Linking Cholesterol to Alzheimer's Disease-like Pathology in Rabbit Brain, Hippocampal Organotypic Slices, and Skeletal Muscle**

Othman Ghribi

*Department of Pharmacology, Physiology and Therapeutics, University of North Dakota School of Medicine and Health Sciences, Grand Forks, North Dakota, ND, USA*

The Editorial Office was notified that there was an ethical concern regarding Fig. 1. Investigating the matter, the Editorial Office was informed by the first author of the paper that he is retired with no more access to the original data. Based on this circumstance and because the validity of some representative images has also been brought into question, the Editorial Office has decided to retract the paper.
