

Preface to JAISE 15(3)

Andrés Muñoz^a, Juan Carlos Augusto^b and Hamid Aghajan^c

^a *Department of Computer Science, University of Cadiz, Cadiz, Spain*

^b *Department of Computer Science and Research Group on Development of Intelligent Environments, Middlesex University, London, UK*

^c *imec, IPI, Department of Telecommunications and Information Processing, Gent University, Ghent, Belgium*

1. This thematic issue

The evolution of interconnected systems and advanced computation has laid the foundation for the emergence of integrated intelligent infrastructures, a subject of growing interest within the realm of ambient intelligence and smart spaces. This thematic issue titled “Applications in Integrated Intelligent Infrastructures” endeavors to shed light on and advance this rapidly expanding field. As a result of the evaluation of the submitted papers to this call, four papers have been selected to explore applications for energy management in smart buildings and in smart health networks; for soil moisture prediction in agricultural infrastructures; and for robot navigation in large spaces. We wish to thank our colleagues Carles Gomez (Universitat Politècnica de Catalunya, Spain), Brenda Bannan (George Mason University, United States) and Anthony Fleury (IMT Nord Europe, France) for their valuable work in managing this thematic issue as guest editors.

2. Upcoming issues

The following is a list of upcoming issues of JAISE:

- December 2023: Regular Issue.
- March 2024: Thematic Issue on “Sensing, Decision-Making and Economic Impact for Next-Generation Technologies”.
- June 2024: Regular Issue.

More information on the call for papers to the future thematic issues is available on the webpage of JAISE at: iospress.com/journal-of-ambient-intelligence-and-smart-environments.
