

Keyword Index Volume 2 (2012)

abscisic acid	33	Fumigants	113
acclimatization	97	fungal diseases	113
acids	169		
Anthocyanin	179	gas chromatography-mass spectrometry	33
anthocyanins	73, 169, 215, 229	genetic diversity	191
antioxidant activity	73	genetic engineering	1
antioxidant capacity	169	germplasm	191
Antioxidants	159, 229	GUS activity	135
Ascorbic acid	229		
		Highbush blueberry	97
beachberry	123	HPLC	215
biomarkers	63		
Blackcurrant	23	IdeaMap	45
blueberry	179, 215	insect	1
Breeding	1, 179	internal fruit quality	143
Cabernet Sauvignon	33	latitude	143
Camarinhas production systems	123	LC-MS	229
cardiovascular disease	63		
climate	179	Methyl Bromide phase-out	113
coconut fibre	207	microbiota	63
crocin bleaching assay	7	morphology	191
crop-wild hybrids	135	multiplication	97
cultivars	23		
		nematodes	113
dessert fruit quality	23	nursery	105
DPPH-EPR scavenging spectra	7	nutritive media	97
environment	73	organic	1
evaluation	23, 191	PAR	143
		pesticide	1
flavonoids	7	Phenolic compounds	33
flavor	45	Phenolic content	7
<i>Fragaria ananassa</i> Duch	143	phenolics	169
<i>Fragaria vesca</i> L.	135	phenology	191
<i>Fragaria x ananassa</i> Duch	135, 191	photoperiod	105
<i>Fragaria x ananassa</i>	73, 105, 207	plant selection	123
<i>Fragaria</i>	1, 45	polyphenol content	179
FRAP	159	polyphenol oxidase	215
fruit colour	143	polyphenols	63, 73, 159, 215
fruit development	143	pre-harvest temperature	143
fruit extracts	7	principal component analysis	191
fruit quality	191	production	113
fruit size	23	psychophysics	45

quality	207	strawberry	45
		sugars	169
reactive oxygen species	215	transgene expression	135
red blood cells	159	trayplant	105
<i>Ribes nigrum</i> L.	23	Vaccinium	1, 169
Ribes	1	virus	1
Ripeness	169	vitamin C	73
rooting	97	water stress	33
Rubus	1	water use	207
SagM	159	yield	23, 207
soft fruit	229		
soilless production	105
