

# Keyword Index Volume 6 (2016)

A549	115	CP-C	125
<i>Actinidia deliciosa</i>	25	cranberry	149
<i>actinidia</i> spp. Psa	407	Cranberry proanthocyanidins	125
adiposity	213	cyanidin-3- <i>O</i> - $\beta$ -glucoside	175
advanced glycation end-products	149	cytotoxicity	263
aging	97		
anthocyanidins	105	degradation product	175
anthocyanins 13, 105, 175, 189, 203, 237, 303, 333		diabetes	203, 213
anthracnose	47	dimethyl disulphide	37
anti-inflammatory	97	disease	93
antioxidant	25, 97, 159, 333	disinfectants	407
antioxidant capacity	81	dose-dependency	137
antioxidant, NOsynthase	277	“Dori”	373
<i>aronia melanocarpa</i>	203	1,3-dichloropropene	37
ascorbic acid	175, 303, 333		
AUC	137	elderberry	321
		ellagic acid	213
bacterial canker	395	ellagitannins	97
barrett’s esophagus	125	encapsulation efficiency	1
BCAs	407	endophytic microbiota	395
berries	13, 93, 105	endothelial nitric oxide	277
berry fruits	237	endothelium-dependent relaxation	277
bioavailability	137	eotaxin-1 (CCL11)	115
biocontrol	65	esophageal adenocarcinoma	125
biological control	395	esophagus	251
biological effects	93		
black chokeberry	203	fertilization	355
black currant	303	flowering stage	417
black mulberry	333	Fragaria	65
black raspberry	251	<i>Fragaria</i> $\times$ <i>ananassa</i>	47
blackberry	175, 321	<i>Fragaria</i> <i>ananassa</i>	291
blackcurrant	277	free radical scavenging	149
blueberries	189, 225	fruit quality	381
blueberry, (poly)phenols	137	fruit ripening homogeneity	373
body fat	203		
Box-Behnken design	1	gelation	1
cancer prevention	251	glucose	237
cellular viability	263	glycemic control	237
chloropicrin	37	gray mold	47
		growth	291
C <sub>max</sub>	137		
colon	251	hard core	381
color	303	health	93
compost	65	human clinical trial	251

hydrogen peroxide	125	procyanidins	115
hydroxyl	159	protective compounds	407
hydroxyl radical	175	pruning	355
		<i>Pseudomonas syringae</i> pv. <i>actinidiae</i>	355
inflammation	225		
insulin	237	radical	159
integrated pest management	47	raspberry ketone	213
inter-individual variability	137	raspberry	213
irrigation	355	red fruits	321
		red raspberry	97
JHAD1	125	refrigeration	189
“Jintao”	373	resistance inducers	407
juice	189	Response Surface Methodology	1
		<i>Ribes nigrum</i>	277
kiwifruit	395, 417	ripening protocol	381
		ROS	125
L-4	115	<i>Rubus idaeus</i>	37
LCMS <sup>n</sup>	13		
lung cancer	105	salicylic acid	291
lung inflammation	115	salinity stress	291
		singlet oxygen	159
metabolic syndrome	225	size	1
1-methylcyclopropene	381	soft rot	47
metam sodium	37	soil disinfestation	37
methyl bromide	37	sorption properties	303
mice	203	sour cherries	81
motor performance	97	standard quality traits	373
mycorrhiza	65	storage	25, 189
		strawberry extract	263
NIRs	373	sugar	333
non-destructive technique	373	superoxide	159
nutraceutical compounds	321	sweet cherries	81
obesity	203, 213	tandem mass spectrometry	175
OE19	125	time of application	291
OE33	125	T <sub>max</sub>	137
oligosaccharides	149	total phenolic compounds	81
oral cavity	251	training system	355
		tumor xenograft	105
peroxyl	159		
peroxynitrite	159	<i>Vaccinium</i>	13
pH	333	<i>Vaccinium macrocarpon</i>	149
<i>Phytophthora cactorum</i>	65	vascular function	225
plant multiplication	37		
pollen quality	417	weed control	37
pollination efficiency	417	wild berry species	321
pollination system	417		
polyphenols	25, 97, 263	Yerba mate	303
proanthocyanidins	13		
processing	189	yields	37
