# Selected papers from the 9<sup>th</sup> international multi-conference on engineering and technology innovation 2019 (IMETI2019)

This Special Issue presents 42 papers selected from the proceedings of the 8<sup>th</sup> International Multi-Conference on Engineering and Technology Innovation (IMETI 2019) which was held from November 15–19, 2019, in Kaohsiung, Taiwan. The articles in this special issue focus on the newest findings and applications of intelligent oriented investigations, including fundamental studies, industrial practices, and engineering innovations. All of the articles underwent a rigorous peer-review. Acceptance into this Special Issue was based on the reviewers' recommendation, mandatory revisions, and final examination by the Guest Editor. It is expected to be a key issue which could inspire researchers for exploring the intelligent technologies.

It is my great pleasure to publish the Special Issue in *Journal of Intelligent and Fuzzy Systems*.

Also, I would like to express my deepest thanks to the reviewers for taking the time to comment on the papers. Moreover, I thank all the authors who have contributed their original work to this issue. Lastly, Special thanks must be delivered to the Editor in Chief/Prof. Reza Langari, Maarten Fröhlich, and Carry Koolbergen, of IOS Press in promptly and efficiently handling the publication of this Special Issue.
