

Keyword Index Volume 11 (2013)

acetazolamide	59	childhood	9
acute lymphoblastic leukemia	55	childhood stroke	131
ADHD	89	children	83, 103, 159, 221
agenesis of corpus callosum	197	children with special healthcare needs	211
alpha-thalassemia mental retardation syndrome (ATR-X) gene	67	chronic inflammatory demyelinating polyradiculoneuropathy	127
alternating hemiplegia	257	CNS	241
angiitis	241	cognition	89
anorectal manometry	177	comorbidity	29
anorectal pressure	177	convulsion	123
anterior sacral meningocele	141	cranial nerve palsy	55
antitubercular therapy	71	CT	235
Arnold-Chiari III malformation	197	CT scan	103
arylsulfatase A	193	Currarino triad	141
aseptic meningitis	227	definite migraine	15, 171
Aspergerfls syndrome	29	demyelination	127
association	111	depression	1
ataxia	35	diabetes mellitus	39
atypical	251	EEG	235
auditory filtering	83	ELBW	59
autism spectrum disorder	79	Ellis-van Creveld	251
autoimmune	201	encephalitis	35
autonomic nervous system	189	enterovirus	227
AVM	247	epidural abscess	141
behavior	89	epilepsy	23, 149, 221
benign childhood epilepsy	89	facial nevus	51
benign enlargement of subarachnoid space	63	feces	227
birth asphyxia	23	focal seizure	97, 235
bradycardia-asystole	183	functional connectivity	79
care coordination	211	gastroenteritis	257
carotid artery dissection	189	generalized epilepsy	83
central hypoventilation	135	genetic influence	15
centrotemporal spikes	89	Guillian-Barre syndrome	127, 159
cerebral edema	39	headache impact test 6	171
cerebral palsy	1, 23, 29	healthcare transition to adulthood	211
cerebrospinal fluid	115, 227	heart rate	149
cerebrovascular disease	131		
Chiari I malformation	107		
child	119, 241		

heart rate variability	149	oxidative stress	221
heart type fatty acid binding protein	149		
HIT-6	15	pili torti	123
holoprosencephaly	197	polymerase chain reaction	115, 227
Holter	149	polysomnography	165
horner syndrome	189	Pourfour du Petit syndrome	189
human parechovirus	115	pre-sacral space	141
hydrocephalus	59, 119	primary	241
hydrothorax	119	probable migraine	15, 171
hypersensitivity	83	psychopathology	221
		psychosocial adversity	1
iatrogenic	183		
imaging	51	remethylation of homocysteine	135
immunoglobulin	97	rituximab	35
immunotherapy	35		
immunotoxicity	97	seizures	103, 135
India	235	sensory processing disabilities	83
infections	235	severe neurological impairment	135
intracranial catheter	183	short sensory profile	83
intracranial hypertension	63	sleep architecture	165
intravenous immunoglobulin	127	sleep disorder	165
ischemia	39	small vessels	241
ischemic stroke	9	spastic cerebral palsy	177
isolated oculomotor nerve palsy	71	spina bifida	211
		spinal cord infarction	131
ketoacidosis	39	staphylococcal meningitis	141
		stroke	39, 257
magnetoencephalography	79	Sturge-Weber syndrome	51, 111
measles	201	subdural hematoma	63
metachromatic leukodystrophy	193	synkinesia	43
microcephaly	135	syringomyelia	107
midbrain tuberculoma	71		
mirror movements	43	tactile sensitivity	83
monoplegia	107	tension type headaches	171
mothers	1	torticollis	107
moyamoya disease	39	transverse myelitis	131
MRI	235	trunkal hypotonia	123
MTHFR deficiency	135	tuberous sclerosis complex	79
neonatal hyperglycemia	59	unilateral foot drop	247
neonatal jaundice	23		
nervous system	251	vaccine link	201
neural tube defects	119	valproate	97
neurodegenerative disorder	193	vasculitis	241
neurofibromatosis type 1	111	ventriculoperitoneal shunt	119
neuroimmune	201		
nodular heterotopias	43	X-linked mental retardation	67
occipital encephalocele	197	yin-yang sign	247
