

Keyword Index Volume 29 (2011)

abulia treatment	347	critical illness	229
activation	405	dementia	295
activities of daily living	173, 311	dependency	311
acute period of stroke	67	depression	9
adaptive plasticity	127	diffuse axonal injury	339
adaptive processes	221	diffusion tensor imaging	85, 111, 305, 339, 401
after-effect	221	diffusion tensor tractography	243, 305, 339, 401
akinetetic mutism	347	disability	99
Alzheimer	295	Disability and Health (ICF)	99
aphasia	305, 401	disability rating	173
arcuate fasciculus	305, 401		
		eccentric contraction	253
backward walking	247	electrical stimulation	37, 393
balance	45, 143	electromyography (EMG)	23
balance confidence	179	electrophysiological	61
bimanual hand therapy	29	EMG patterns	67
body weight supported treadmill training	79	end stage renal disease	111
brain injury	1, 221	ethnicity	275
brain plasticity	271	etiology	317
brain recovery	331	Ewald's second law	127
brain tumor	271	exercise	157, 185
Brown-Séguard syndrome	353	extracorporeal shock wave therapy	413
callisthenic exercises	91	foot-drop	393
cerebral palsy	23, 29, 233, 413	forward walking	247
chronic dizziness	179	functional assessment	173
co-activation	405	functional electrical stimulation	67, 261
cognition	111, 311	functional MRI	253, 271, 359
cognitive capacity	373	functional sensibility	373
cognitive mechanism	331		
cognitive rehabilitation	221	gait	37, 233, 247
cognitive reorganization	331	gait deviation index	233
common mode rejection	127	guidance	295
compensation	153		
computer-based rehabilitation	221	habituation	179
concentric contraction	253	hand	53
context dependency	127	handicap	173, 179
cortical activation pattern	253	health anxiety	179
cortical bone	261	hemiparesis	53, 359
cortical reorganization	271	hemiparetic	29
corticospinal tract	85, 243, 339	household ambulator	233
CP	37	hypertonia	413

imbalance	143	prehab	153
inner ear	143	prognosis	85
intensive care	229	push-pull	127
internal models	127		
International Classification of Functioning	99	race	275
interpolated twitch technique	405	randomized controlled study	61
intracerebral hemorrhage	85	recovery	153
ipsilateral motor cortex	359	REF-model	221
		rehabilitation	29, 79, 91, 153, 185, 295, 317
kalman filter	127	restraint	29
kinematics	233	rhythmic auditory stimulation	233
		robotic horseback riding therapy	23
learning	295	robotic therapy	79
levodopa	247		
levodopa therapy	347	schwannoma	153
locomotor movements	67	SCI	9
locomotor training	79	scoliosis	23
		self control study	29
magnetic resonance imaging (MRI)	23	semicircular canals	127
medication	405	sensorimotor integration	127
memory	117	spasticity	53, 61, 393, 413
microgravity	185	spinal cord injury	79, 275
mild traumatic brain injury	167, 317	stab injury	353
minorities	275	step variability	45
motor recovery	85, 243, 271, 339, 393	stretch	53
motor skill	295	stroke	53, 85, 305, 311, 359, 365, 381, 393, 401
MRI	353	subjective organization	117
multi-centre study	99	substance abuse	1
multiple sclerosis	197	substance use disorders	1
multiple sclerosis (MS)	91		
muscle strength	405	trabecular bone	261
muscle tone	413	transcranial magnetic stimulation	243, 365
		transfer of learning	117
nerve repair	373	transtentorial herniation	243
neural reorganization	331	traumatic axonal injury	339
neurological restoration	381	traumatic brain injury	45, 99, 117, 339
neuromotor rehabilitation	67		
neuroplasticity	331	ultrasound	61
neuromotor rehabilitation	381	upper extremity	373
		upper limb hemiparesis	365
observation	295		
occupational therapy	365	velocity storage	127
osteogenic osteoporosis	261	vertigo	143
otoliths	127	vestibular	143, 153, 167, 185
outcomes	275	vestibular impairment	173
		vestibular rehabilitation	157
Parkinson's disease	247, 405	vestibular rehabilitation	127
part-whole learning	117	vestibulocollic reflex	127
physical therapy	167	vestibulo-ocular reflex (VOR)	127, 143
plasticity	221	vestibulospinal reflex	127
polyneuropathy	229	walking speed	45
