

## Keyword Index Volume 31 (2012)

acquired brain injury	19	community care	3
activity of daily living	19, 185	community reintegration	3, 41
amytal	95	community-based	63
ankle-foot orthosis	387	compensatory visual scanning	19
anoxia	319	computed tomography (CT)	223, 227, 245
arteriovenous malformation	131	computers	453
assessment of motor and process skills	453	constraint-induced movement therapy	357
assistive device	387	contracture	215
atrophy	319	cortical activation	349
axonal injury	143	corticospinal tract	207, 395
axonal pathology and mild traumatic brain injury	261	critical illness	311
balance	161, 197	data collection	41
behavior analysis	41	dementia	107
behavioral neurology	295	depression	443
behavioral strategies	41	dexterity	137
Benign Paroxysmal Positional Vertigo (BPPV)	435	diffusion tensor imaging (DTI)	131, 143, 223, 227, 245, 261, 281, 295, 395
Betahistine Chloride (BC)	435	diffusion tensor tractography	207
biofeedback	429	disorders of consciousness	345
biopsychosocial	3	EEG	349
botulinum toxin	117	elbow	373
brain injury	3, 41, 51, 75	ethyl alcohol	373
brain plasticity	143	eye movements	171
brain trauma	295	family therapy	75
burden	443	foot drop	387
cane usage	137	forced use	185
caregivers	75, 443	functional goal-oriented movements	421
casting	409	functional motor tasks	421
central pattern generator	401	functional MRI	395
cerebellar ataxia	429	gait	147, 395
cerebrovascular disease	331	gamma knife surgery	131
children	223, 245	head trauma	143
chronic disease management	85	health complications	85
chronic widespread pain	367	healthy aging	85
cingulum	143	hemianopia	19
clinical decision	409	hemiplegia	161
clinically isolated syndrome	147		
cognitive impairment	311, 319		
cognitive rehabilitation	31, 295		
community based rehabilitation	3		

hemispatial neglect	171, 197	persistent vegetative state	345
hemorrhagic pathology	261	physiotherapy	429
home exercise program	185	post-acute rehabilitation	3
hypertonicity	409	post-deployment	367
ICU	311	postural control	429
information processing	31	posturography	429
intelligence	157	proprioceptive sense	137
intervention	75	psychosocial functioning	185
ipsilateral upper limb	137	quality of life	19
ischemic infarct	331	Quality of Life (QoL)	435
lesions	311	randomized controlled trials	107
line bisection	171	recovery of stepping	401
magnetic resonance imaging (MRI)	223, 227, 245	rehabilitation	331
measurement	161	rehabilitation therapy	435
memory	295	reliability	215
mental practice	197	return to work	51
mentoring	63	self-management	41
meta-analysis	107	semantic clustering	295
mild traumatic brain injury	367	sialorrhea	117
minimally conscious state	345	sodium amobarbital	95
mobility	19	sodium amytal interview	95
modified AFO	387	somatotomy	395
Modified Modified Ashworth Scale	215	spastic hemiparetic cerebral palsy	357
motor complete lesion	401	spasticity	215, 373, 409
motor fatigue	147	spinal cord injury	63
motor function	207	stroke	19, 157, 161, 185, 207
motor imagery	349	stroke rehabilitation	379
motor skill	157	structural neuroimaging	295
MRI	147	susceptibility-weighted imaging	261
multiple sclerosis	147	topographical map	349
muscle strength	147	transcallosal fiber	395
musculocutaneous nerve	373	traumatic brain injury	19, 31, 63, 85, 281
neural degeneration	131	ultrasound	373
neuroimages	345	upper extremity	453
neuroimaging	223, 245, 311, 319, 331	upper extremity function	379
neuroimaging primer and analysis	227	upper extremity functioning	185
neurological vision deficits	19	upper extremity neuromotor control	421
neuroophthalmology	171	upper extremity neurorehabilitation	421
neuroplasticity	157	upper limb	409
neurorehabilitation	117, 223, 227, 245, 281, 319, 429	upper limb function	357
nursing	85	virtual environment	357
obstetrical brachial plexus palsy	117	virtual reality	357, 379
occupational therapy	107	visual field defects	171
pain	215	vocational rehabilitation models	51
peer support	63	walking	387
		whole-body tilt exercise	197
