

Keyword Index Volume 2 (2014)

ageing	133	GLUT4	35
aging	125	gut microbiota	45
aging, postural balance	213		
alcohol intake	85	immune response	157
alcohol	101, 189	inflammation	91, 101
all-cause mortality	85	insulin resistance	15
Alzheimer's disease	223		
AMPK	35	ketones	223
anthocyanins	1, 145		
antioxidant diets	233	lactic acid bacteria	145
antioxidant	189	learning	213
		linear mixed models	91
bioavailability	1	longitudinal study	91
blood glucose	35		
brain	15	malnutrition	69
		maze learning	213
calorie restriction	157	memory	125, 223
cancer	45	metabolism	1, 111
cardiovascular disease	101, 139	microbiota	1
cardiovascular risk	189	midlife women	91
Champagne wine	125	Mild Cognitive Impairment	223
coagulation	91	mitochondria	157
cognition	125, 133, 213	mobility limitation	213
colon	111	moderate wine consumption	91
cosmic rays	233	muscle	35
CVD	125		
		neuroinflammation	233
dementia	85	nuclear magnetic resonance	15
diabetes	35, 157	nutrigenomics	157
diet therapy	213		
		obesity	157
elderly	85	older patients	69
endothelial function	139	oxidative stress	101, 233
executive function	213		
		phenolic acids	111, 125
fibre	45	pinot noir	145
flavonoids	139	polyphenol	35, 45, 101, 125, 133, 145
fructose	15	proanthocyanidins	111
fruit and vegetables	45	proton MRS	223
gait	213	red wine	139
gastric absorption	1	resveratrol	15, 133
genetics	189		
glucose hypometabolism	223	taste enhancement	69
glucosinolate	45		

umami	69	vitamin A-deprived diet	15
vascular health	139	wine	101
