

Announcement

First International Conference on Biomedical Spectroscopy: *From molecules to men*

7–10 July 2002, Cardiff, South Wales, UK

The first international conference on Biomedical Spectroscopy will bring together spectroscopists and life scientists, from academia and industry, engaged in solving problems of biological and biomedical interest using diverse spectroscopic techniques.

The interdisciplinary nature of the conference will encourage scientific interchange and cross-fertilisation of ideas.

Application of spectroscopic techniques such as

Mass spectrometry, FTIR, NMR, EPR, ENDOR, NIR, SPR, Raman, CD, EXAFS, UV/Visible, Atomic Force Spectroscopy, Neutron Spectroscopy, Dielectric Spectroscopy, Fluorescence Spectroscopy and so on,

for solving problems in diverse areas of life science including

- *Biomedical and Clinical Science,*
- *Biochemistry and Biophysics,*
- *Biomaterials and Biosensors,*
- *Proteomics and Pharmaceuticals,*
- *Biotechnology and Biomedical Engineering.*

Scientists employing spectroscopic techniques in life science research are invited to submit proposals for lectures and poster presentations. Papers presented at the conference will be reviewed and published in a special issue of *Spectroscopy*. For submission of proposals and other information please contact:
