Journal of Official Statistics

An International Review Published by Statistics Sweden

JOS is a scholarly quarterly that specializes in statistical methodology and applications. Survey methodology and other issues pertinent to the production of statistics at national offices and other statistical organizations are emphasized. All manuscripts are rigorously reviewed by independent referees and members of the Editorial Board.

All inquiries about submissions and subscriptions should be directed to jos@scb.se

Contents Volume 20, Number 1, 2004

The Effect of Multiple Weighting Steps on Variance Estimation <i>Richard Valliant</i>	1
Combining Link-Tracing Sampling and Cluster Sampling to Estimate the Size of Hidden Populations <i>Martin H. Félix-Medina and Steven K. Thompson</i>	19
Nonresponse in Time: Some Lessons from Major Finnish Surveys <i>Kari Djerf</i>	39
Towards a Social Statistical Database and Unified Estimates at Statistics Netherlands <i>Marianne Houbiers</i>	55
A Simultaneous Analysis of Interviewer Effects on Various Data Quality Indicators with Identification of Exceptional Interviewers <i>Jan Pickery and Geert Loosveldt</i>	77
Frequency Reports Across Age Groups <i>Bärbel Knäuper, Norbert Schwarz and Denise Park</i>	91
Extracting Confidential Information from Public Documents: The 2000 Department of Justice Report on the Federal Use of the Death Penalty in the United States <i>David J. Algranati and Joseph B. Kadane</i>	97
