

# Forthcoming meetings of the Conference of European Statisticians

## **Working party on transport statistics (Geneva, November 1992)**

The Working Party will review a wide range of activities including: status of work on the 1990 censuses of road traffic; methodological problems related to development, harmonization and reconciliation of non-harmonized transport statistics; specific problems in connection with statistics on the transport of dangerous goods and road traffic accident statistics. Participants will also discuss recent research and experiences in the collection of transport statistics as well as preparation of a workshop on transport statistics.

## **Consultation on the European Comparison Programme within the ICP (Vienna, November 1992)**

The Consultation hosted by the Austrian Central Statistical Office will discuss (i) the detailed results of the ECP 1990; (ii) the specific circumstances in countries in transition and their repercussions on the ECP results since 1990; (iii) the outline of the report on the ECP 1990; and (iv) conceptual and organizational issues regarding the next phase of the ECP with particular reference to the countries in transition.

## **ECE-ILO-QECD joint work session on labour statistics (Paris, December 1992)**

This meeting will primarily focus on issues of concern for transition countries. The participants will discuss recent developments in labour force surveys in their countries; issues of concern to transition countries in measuring employment, labour force turnover, unemployment, wages and labour costs; informal sector statistics; and issues of comparability of labour statistics between transition countries and other countries.
