

Keyword Index Volume 5 (2007/9)

γ surface	13	incubation time	133
AE	109	interatomic potential	13
austenite	89	iron	13
		Kirchhoff	53
backscattered electron	167	low-cycle	89
bainite	89	LSI	97
beam	53		
body centered cubic	13	martensite	89
brittle fracture	27	martensitic block	39
		martensitic packet	39
cast iron	79	martensitic steel	39
chloride droplet	109	mechanics of solids	63, 143
crack	63	micro-crack	133
crack coalescence	1	microstructure	167
crack propagation	1	molecular mechanics	13
crack shielding effect	143		
creep	117	orientation imaging	39
creep crack	39		
creep crack growth	133	P92	39
creep crack initiation	133	parallel non-symmetric cracks	143
creep damage	133	plate	53
creep-fatigue	89, 167	precipitates	167
cyclic dependent mechanism	117	prior austenite grain	39
De Saint Venant	53	RNOD	133
dislocation-free zone	27	rupture	97
dynamic fracture toughness	27		
		SCC	109
electromigration	97	slip	13
electron backscatter diffraction	39	slip plane	13
electron microscopy	167	slip system	13
elevated temperature	89	SUS304	109
fatigue life prediction	1	TEM observation	117
fatigue test	1	temperature distribution	79
ferritic heat-resisting steel	167	tensile strength	79
friction welding	79	theoretical shear stress	13
full lamellar TiAl intermetallic compound	117	thin plate	109
functionally graded materials	53, 143	trigger point	27
functionally graded piezoelectric materials	63		
		void	97
generalized stacking fault	13		
glass ceramics	1	water environment	1
grain boundary	167		
high temperature fatigue	117
