

## Keyword Index Volume 9 (2015)

acoustic emission	251	internal inclusion	197
advanced steels	71	<i>J</i> -integral	149
analytical analysis	125	law of fracture life	95
analytical solution	149, 233	LICON	61
beam theory	149, 233	life assessment	15
bursting pressure	175	load frequency	275
C–Mn	87	maximum energy release rate	265
characteristic area size	161	maximum tangential stress	265
composite	175	minimum strain density	265
copper	137	misorientation	95
corrosion fatigue crack growth rate	275	mixed-mode fracture	265
crack growth	15, 43	mode II longitudinal fracture	233
crack opening displacement	211	modified model	197
creep	3, 31, 43, 71	modified NSW model	125
creep crack growth	31, 87	mounded LPG storage vessel	251
creep crack growth rate	125	multi-axial creep damage enhancement	61
creep crack initiation time	125	multilayered material	233
creep damage	15	multiple cracks	211
creep–fatigue conditions	95	neural-net	3
creep–fatigue interactive condition	111	Ni-base directionally solidified superalloy	111
$C_t$ parameter	3	nickel-base superalloy	95
damage	87	non destructive testing	251
damage mechanics	15	non-equilibrium science	111
ductile tearing	43	non-linear fracture	149
Dugdale model	211	orthodontic retainer	187
EBSD	95	P22	87
fatigue	3, 15, 71	P91 martensitic steel	125
fatigue life	161	petrochemical industry	251
fatigue strength	137, 197	physical non-linearity	233
finite element analysis	87	prediction model	197
flexible operation	71	progressive damage	175
fracture life	111	reliability	3
FRC-wires	187	<i>S–N</i> curve	161
friction welding	137	stress intensity factor	211
full-wrapped	175	tensile strength	137
FV520B	161	Ti–6Al–4V alloys	275
gas cylinder	175	titanium	137
heat treatment	161	type-IV damage	31
high Cr ferritic steel	31		
hydrogen embrittlement	275		
hydrotest	251		

very high cycle fatigue	161, 197	welded joint	31
Weibull distribution	137	yield zone	211
