Technology and Disability 26 (2014) 239–240
IOS Press

Keyword Index Volume 26 (2014)

accessibility 93
accessibility assessment 117
action research 39
adaptations 1
Alzheimer's disease 1
anxiety 161
assessment 171
assistive devices 191
assistive technology 39, 105, 171, 191, 211
assistive technology assessment process 27
assistive technology databases 127
assistive technology information providers 127
AT 93
ataxia 23
augmentative and alternative communication (AAC) 49, 79, 93
augmentative manipulation 65
autonomous locomotion 161

barriers 221
botulinum toxin 23
brain injury rehabilitation 11

children 171
cognition simulation 117
cognitive impairment 93
compensatory strategies 11
continence 153
cross-culture 199

diffusion of innovation 39
Duchenne muscular dystrophy 105

electric wheelchair 105
ethnography 199
evaluation 117

feeling of security and independence 161
free and open-source software 93

graphical symbols 93
GUI simulation 117

home modifications 1
housing 1

ICF 11, 27, 39
ICT assistive products 127
incontinence 153
independence 221
input device 105
interdisciplinary 39
iTV 199

knowledge translation 39

Lego Robots 49
literacy 93
localization 211

measurement 153
mobility training 211
mouse emulation 49
MPT model 27
multiple disabilities 171

navigation 211
neurophysiology 65

older adults 1
older people 199
online video portals 199

patient perspective 153
PIADS 153
policy 137
prescription process 191
primary need 137
process standard 39
product description 127
Psychologist 27
